**Report description:**

The online voting system involves online registration of voters, casting of votes, vote counting, and declaring of voting result. This system is beneficial as compared to traditional paper voting as voters can cast votes through the use of any resource such as personal computers, smartphones, and systems arranged by voting institutions. It also helps in reduction of vote hacking or tampering. Moreover, the system is effective and authentic in comparison to conventional voting system structure. Furthermore, online voting system helps in minimizing corruption and raises voter turnout with voters casting their votes from any remote location or site.

High adoption rate of using mobile devices and enhanced voter experience with less infrastructure propels growth of the global online voting system market. In addition, ease in counting and advantages provided to physically disabled people fuel growth of the market. However, lack of understanding about voting software and increase in security concerns of online voting is expected to impede the market growth. Furthermore, increase in adoption of technological advancements in the government sector, coupled with effective government policies is expected to provide lucrative opportunities for the market growth.

The global online voting system market is segmented on the basis of component, deployment model, end user, and region. By component, it is divided into solution and service. In terms of deployment model, it is segregated into on-premise and cloud. In terms of end user, it is classified into government, universities & colleges and enterprise. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Major players operating in the online voting system market include Avante International Technology, Inc., Australian Electoral Commission, benel Solutions, Clear Ballot Inc, Dominion Voting Systems Corporation, ElectionBuddy Inc, ezvote, Hart InterCivic Inc, Inshtrix Research Inc, POLYAS, Skypunch Technology Inc, Smartmatic, nVotes, Votebox, Votem Corp, BallotReady, and Democracy Live Inc. These players have adopted various strategies to increase their market penetration and strengthen their position in the industry.
