**Report description:**

Operational risk management consulting services refers to the professional advisory services provided to organizations to identify, assess, manage, and mitigate operational risks. Operational risks refer to risks that arise from internal processes, people, systems, or external events that can affect an organization's ability to achieve its business objectives.

The primary driver for the growth of operational risk management consulting services in the manufacturing market is the increase in awareness of the risks associated with manufacturing processes. This has led to a surge in demand for risk management services that can help manufacturers to identify and manage risks more effectively. Furthermore, the rise in complexity of manufacturing processes has fueled the growth of the market. As manufacturing processes become more complex, the risks associated with these processes increase. Hence, manufacturers are increasingly turning to operational risk management consulting services to help them manage these risks. However, the higher costs of operational risk consulting services and lack of awareness among manufacturers about the importance of operational risk management restrain the growth of the operational risk management consulting services in manufacturing market. On the contrary, the increase in demand for risk management services in emerging economies, where manufacturing is growing rapidly, is expected to propel the growth of the market in upcoming years. Furthermore, new technologies such as artificial intelligence (AI) and machine learning (ML) provide the opportunity to

optimize manufacturing processes. Thus, this factor is expected to provide lucrative growth opportunities for the market in the coming years.

The operational risk management consulting services in manufacturing market is segmented on the basis of type, organization size, manufacturing type, and region. By type, it is categorized into people risk/internal fraud, systems risk/technological failure, external risk, legal & regulatory risk, process risk, and others. By organization size, it is bifurcated into large enterprises and small & medium-sized enterprises. By manufacturing type, it is classified into process manufacturing and discrete manufacturing. The process manufacturing segment is further divided into chemical, refining, pharma, energy & power, food & beverage, pulp & paper, and others. The discrete manufacturing segment is further categorized into automotive, aerospace & defense, semiconductors & electronics, and others. By region, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The report analyzes the profiles of key players operating in the loan management software market such as Accenture, Bain & Company, Inc., Boston Consulting Group, Deloitte, Gartner, Inc., KPMG International, McKinsey & Company, Oliver Wyman, LLC, PwC, and Roland Berger GmbH.
