Report description:

The global produce packaging market size was valued at \$35,599.2 million in 2021, and is projected to reach \$53,808.7 million by 2031, registering a CAGR of 4.1% from 2022 to 2031.??

Produce packaging includes various types of packaging materials such as plastic containers, cardboard boxes, bags and liners, and trays. It offers various features such as preventing or reducing product damage and food spoilage and extending the shelf life.??

The global produce packaging industry experiences development due to several factors that protect fresh produce from physical damage such as hitting, wetting, and bruising. Produce packaging allows for fresh produce to reach the consumer in the most economic way and creates ease of storage. In addition, the right selection of materials for packaging and associated technologies play a vital role in the maintenance of product quality and freshness during storage and distribution. Materials that have traditionally been used in fresh produce packaging include plastic, paper and paperboard, and others. Moreover, increase in disposable income and surge in awareness among buyers of organic fresh produce are the factors that drive the growth of the market.?

The market is segmented on the basis of material, packaging type, application, and region. On the basis of material, the market is divided into plastic, paper and paperboards and others. On the basis of packaging type, the market is classified into corrugated boxes, bags and liners, plastic containers, and Others. On the basis of application, the market is categorized into fruits and vegetables. Region-wise, the global market analysis is conducted across North America (the U.S., Canada, and Mexico), Europe (UK, France, Germany, Italy, and the Rest of Europe), Asia-Pacific (China, Japan, India, South Korea, and Rest of Asia-Pacific), and LAMEA (Latin America, the Middle East, and Africa).?
