**Report description:**

Sustainable finance is defined as investment decisions that take into account the environmental, social, and governance (ESG) factors of an economic activity or project. Environmental factors include, mitigation of the climate crisis or use of sustainable resources. Social factors include, human and animal rights, as well as consumer protection and diverse hiring practices. Governance factors refer to the management, employee relations, and compensation practices of both, public and private organizations.

Investments in businesses with sustainable practices is rapidly growing as demand for finance professionals with expertise in the sustainable finance is a rapidly growing field. In addition, sustainable finance offers cost cutting and risk mitigation along with better returns. Moreover, there is a decreased exposure to sustainability related risks. Therefore, these are some of the factors propelling the growth of the sustainable finance market. However, diversification issues of sustainable finance and its high operating costs is a major factor limiting the growth of the sustainable finance market. On the contrary, growing awareness about sustainability among various sectors is expected to provide lucrative growth opportunities in the coming years.

The sustainable finance market is segmented on the basis of investment type, transaction type, industry vertical, and region. By investment type, the sustainable finance market is segmented into equity, fixed income, mixed allocation, and others. By transaction type, the sustainable finance market is segmented into green bond, social bond, and mixed-sustainability bond. The mixed-sustainability bond is further divided into sustainability bonds, and sustainability linked-bonds. By industry vertical, the sustainable finance market is segmented into utilities, transport and logistics, chemicals, food and beverage, government, and
