### **Report description:**

The global textile fabrics market size was valued at \$498.0 billion in 2021, and is projected to reach \$942.8 billion by 2031, registering a CAGR of 6.7% from 2022 to 2031.

Textile business uses a wide variety of fabrics, including wool, silk, cotton, and polyester. Wool which is essentially of hydrogen, carbon, sulphur, and nitrogen, is extensively used to manufacture insulation products including winter wears, blankets, carpeting, upholstery, and others. Furthermore, the products made from the same are used to absorb odour and noise in heavy machinery, thereby contributing toward the growth of technical application. Other raw materials used in the production of textiles are silk, minerals such as glass fibres and asbestos, and other synthetic material. Silk finds extensive use in the manufacturing of clothing, surgical suture, parachutes, silk comforter, and various others having high strength and elasticity. This is anticipated to propel the market growth during the projection period.

The enormous growth in the requirement for apparel, increase in demand for sportswear, rise in disposable income, rapid urbanization, increase in exposure to social media, social media business, and rise in popularity of influencers have contributed to the massive growth of the global textile fabrics market. Furthermore, rise in trend of smart textiles in the market that use optical fibres, metals, and various conductive polymers to interact with the environment, thus it is projected to propel the market over the forecast period. Textile fabrics help in detecting and reacting to various physical properties including mechanical, thermal, or chemical and electric. This is anticipated to drive market growth during the forecast period. However, the expansion of the market is projected to be restrained by the unstable cotton prices and the current import-export pattern of trading countries.

The global textile fabric market is segmented on the basis of fabric type, application, and region. On the basis of fabric type, the market is classified into cotton, polyester, polyamide, and others. On the basis of application, the market is classified into fashion & clothing, household, and technical. On the basis of region, the market is classified into North America, Europe, Asia Pacific, and LAMEA.
