Report description:

Venture capital investment is a type of private equity investment that involves investing in companies that require capital. Capital is frequently needed for a company's early establishment or expansion. Therefore, wealthy investors like to invest their capital in startups with a long-term growth perspective. This capital is called venture capital and the investors are called venture capitalists. It is a way for companies to receive money in the short term and for investors to grow wealth in the long term.

Venture capital investment offers higher potential return as the chance for a very high return is an important reason to invest in startups. Furthermore, investment opportunities that entail high risks can provide a higher return on investment. Investors who are willing to take great risks in early stages can expect correspondingly great returns. In addition, surge in technology sector is a major factor propelling the growth of venture capital investment market. However, more competition from alternate funding models and requirement for extensive due diligence, along with time-consuming process of venture capital exits, are the major factors limiting the growth of venture capital investment market. On the contrary, rise in number of retail investors and their ability to democratize the venture capital market and remove the barriers of entry are expected to provide lucrative growth opportunities in the coming years.

The venture capital investment market is segmented on the basis of funding type, fund size, industry verticals, and region. By funding size, it is segmented into first-time venture funding and follow-on venture funding. The first-time venture funding is further sub-segmented into private equity firms and HNWs. By fund size, it is segmented into under \$50 m, \$50 m to \$100 m, \$100 m to \$250 m, \$250 m to \$500 m, \$500 m to \$1 b, and above \$1 b. On the basis of industry verticals, it is segregated into
