Australia Used Cooking Oil Market Research Report Forecast to 2032

Market Overview

The used cooking oil (UCO) market in Australia is witnessing significant growth driven by various factors such as increasing environmental consciousness, rising demand for sustainable fuel alternatives, and government initiatives promoting renewable energy sources. The market is poised for expansion as stakeholders across industries recognize the potential of UCO as a valuable resource for biodiesel production and waste reduction.

One of the primary drivers behind the growth of the UCO market in Australia is the growing awareness of environmental sustainability among consumers, businesses, and policymakers. With concerns about climate change and pollution mounting, there is a heightened emphasis on reducing carbon footprints and embracing eco-friendly practices. This shift in approach has led to increased interest in recycling and repurposing used cooking oil, which can significantly mitigate environmental harm and contribute to a more sustainable future.

Moreover, the Australian government's support for renewable energy initiatives and biofuel production has created a conducive environment for the development of the UCO market. Through incentives, subsidies, and regulatory frameworks, policymakers are encouraging investments in the biodiesel sector, thereby stimulating demand for used cooking oil as a feedstock. This proactive approach not only fosters innovation and entrepreneurship but also aligns with broader national goals of reducing dependence on fossil fuels and promoting clean energy alternatives.

The Australia used cooking oil market was valued at USD 68.86 million in 2022 and expected to reach USD 104.09 million by 2032, registering a CAGR of 4.26% over the forecast duration.

Market Segmentation

Based on the source, the market has been segmented into food manufacturers, HORECA, household and others. Among them, HORECA segment is the largest segment of the market accounting for 56.33% of the Australian market in 2022.

Based on application, the used cooking oil market has segmented into biodiesel, oleochemical products, animal feed and others). Biodiesel segment held the largest market share (79.35%) in 2022.

Market Overview

Major players are Veolia Environment S.A., Darling Ingredients Inc., Greenlife Oil Holdings, Auscol, OZ OILS Pty. Ltd, and Revive Oils Pty Ltd.
