Mobile money is a payment type based on accounts held by a mobile operator and accessible from subscribers' mobile phones. It offers simple person-to-person transactions rather than complex banking transactions. It provides an easy, fast, secure and cost-effective way of making payment.

Ghana is one of the major African mobile money markets. The factors like increasing trend of convenience in service delivery, expansion in mobile money agent network and implementation of mobile money interoperability, are driving the mobile money market in the region. Various regulations and guidelines have also been implemented to strengthen and protect the mobile money system in the country. People in the country are preferring mobile payment mode in order to eliminate the threat of theft. Moreover, recent developments in mobile money interoperability have boosted the efficiency and accessibility to transfer the money easily for various applications. The EMI (electronic money issuers) guidelines introduced by the bank of Ghana has contributed a lot to the growth of mobile money system in the region. In addition to this, various other factors are also accelerating the growth of the market such as government support, rising internet penetration, implementation of interoperability and increasing financial literacy.
