Report description:

The Tanzania mobile money market size reached US\$ 70.9 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 211.7 Billion by 2032, exhibiting a growth rate (CAGR) of 12.5% during 2024-2032.

Mobile money is a payment method that allows people to receive, store and spend money using a mobile phone. It is sometimes referred as a 'mobile wallet' or by the name of a specific service platform such as M-Pesa, GCash, EcoCash, Tigo Pesa, etc. The easy and safe electronic payments make mobile money a popular alternative to bank's brick-and-mortar approaches.

Tanzania is the largest mobile money market in Africa. It has become the first country in Africa to introduce interoperability between rival mobile money services. The market has been driven by the ubiquity of mobile phones among people from all socio-economic backgrounds with extensive coverage of mobile networks and penetration of internet. According to industry reports, 64% of adults in Tanzania use mobile phones for financial transactions. Various financial services, such as microloans, mobile insurance, hospitalization covers via mobile money and the credit services offered by mobile operators, have increased the number of mobile money accounts in the region. Mobile money has also been evolved beyond simple money transfer and allows people to save, insure and borrow money as well. Moreover, banks in the country are transforming their physical footprints and customer experience which has further helped them to promote a broader awareness of various financial services.
