Report description:

The Saudi Arabia weight loss market size reached US\$ 1.5 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 2.5 Billion by 2032, exhibiting a growth rate (CAGR) of 6% during 2024-2032.

In Saudi Arabia, the demand for weight loss services has experienced a healthy growth owing to the escalating obesity rates in the country. The prevalence of overweight and obesity have been increasing with industrial development, which in Saudi Arabia is related to the significant growth in incomes resulting from the rich deposits of oil reserves and the resultant impact of rapid urbanization and improved living conditions.

Catalysed by westernisation and urbanisation, dietary habits and lifestyles in Saudi Arabia have been changing over the past few decades. Rising number of international fast food chains, reduced physical activity and increasing consumption of processed foods, etc. have been catalysing the prevalence of overweight and obesity in the region. The country now has one of the highest obesity rates in the world with the prevalence being higher in women compared to men.

Saudi Arabia Weight Loss Market Drivers:

The growing awareness among the consumers regarding unhealthy eating and lifestyle habits including lack of exercise, eating late at night, high-fat diets, etc. have created a huge demand for weight management products, thereby impelling the weight loss market in Saudi Arabia.

The initiatives and educational campaigns by the Saudi Arabian government regarding the ongoing rise in obesity rates and related illnesses, such as joint problems, diabetes, cardiovascular diseases, high blood pressure, cancer and metabolic syndrome is supporting the growth of the weight loss market.

With elevating incomes, improving healthcare infrastructure and medical advancements, consumers are increasingly opting for weight loss surgeries such as gastric bypass, liposuction, biliopancreatic diversion, etc.
