Report description:

The global classroom displays market size reached US$ 85.9 Billion in 2023. Looking forward, IMARC Group expects the market to reach US$ 472.3 Billion by 2032, exhibiting a growth rate (CAGR) of 20.2% during 2024-2032. The thriving education industry, rising demand for education projectors, and the growing adoption of interactive tables in schools represent some of the key factors driving the market.

Classroom displays are used by teachers to create an encouraging and creative classroom environment. They develop the skills of teachers in display techniques while helping them to promote active learning. They also aid in various teaching methods, such as anatomical models, number lines, and letters of the alphabet. They comprise child created, decorative, conceptual and interactive bulletin boards and used to maximize the learning and personal skills of students by inspiring them to work together. They promote visual learning and interactive lessons by developing their creativity. They keep students engaged in brainstorming activities by continuously updating the information. They also assist students in contributing creative ideas and stimulating creative displays and consequently find applications in class management, such as lists of routines, responsibilities, tasks, rules, directions, labels, and instructions.

Classroom Displays Market Trends:
At present, the increasing demand for classroom displays in elementary and secondary education settings to help teach students about specific topics or concepts represents one of the key factors supporting the growth of the market. Besides this, there is a rise in the demand for education projectors with enhanced features, such as closed captioning support and the ability to connect to school networks, across the globe. This, along with the growing demand for interactive flat panels and interactive tables in classrooms, is offering a favorable market outlook. In addition, there is an increase in the demand for interactive flat panels due to

various benefits, such as the ability to display multiple input sources simultaneously, interact with the content on the screen using a stylus or finger, and save and recall annotated content. This, coupled with the burgeoning education industry, is contributing to the growth of the market. Moreover, key players are introducing interactive tables that allow students to interact with the content on the screen using their hands or other objects to offer a more interactive and engaging learning experience. Additionally, the rising awareness among the masses about the benefits of classroom displays is propelling the growth of the market. Furthermore, the growing number of e-learning courses offered by educational institutions worldwide is positively influencing the market.
