Report description:

In 2023, home and garden in Brazil continued to experience high value growth, albeit at a decelerated pace, influenced by a blend of discernible trends and economic dynamics. The substantial drop in inflation from 9.2% in 2022 to 4.5% in 2023, alongside a steady increase in consumer expenditure on household goods and services, contributed to industry growth. Increased disposable incomes and consumer confidence further fuelled spending on home-related items, driving growth throughout the year.

Euromonitor International's Home and Garden in Brazil report offers a comprehensive guide to the size and shape of market demand at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the categories driving growth.
