Report description:

The global flow cytometry market is estimated to reach USD 10.3 Billion by 2032 from USD 5.1 billion in 2024, at a CAGR of 9.2% during the forecast period of 2024 to 2032. Advancements in reagent technologies, such as fluorophore conjugation and specificity enhancement is one of the major factor uplifting the market growth. The dominance of the reagents and consumables segment among product and services factors is notable in the flow cytometry market. This segment holds sway due to continuous demand for antibodies, dyes, and other consumables essential for cell analysis. As the use of flow cytometry expands in research, clinical diagnostics, and drug development, the need for high-quality reagents remains constant.

"Cell-Based flow cytometry market is likely to grow at faster pace"

Based on the technology, the flow cytometry market is cell-based and bead-based flow cytometry. Cell-based flow cytometry segment dominated the market in 2023. The dominance of cell-based flow cytometry in the technology segment is pronounced due to its versatility in analyzing various cell types and biomarkers. Its ability to provide quantitative and qualitative data swiftly has made it indispensable in biomedical research, clinical diagnostics, and drug discovery, thus driving its market significance.

"The research application dominated the applications segments"

Based on the end user, the flow cytometry market is segmented into research applications, clinical applications, and industrial applications. The research application dominated the segment however clinical application is anticipated to grow at significant CAGR during the forecast period. The extensive use of flow cytometry in basic and translational research across diverse fields

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

such as immunology, oncology, and microbiology is likely to drive the segmental growth.

"Asia Pacific region estimated to show fastest growth rate."

Geographically, the flow cytometry market is segmented into North America, Europe, Asia Pacific, Latin America, the Middle East and Africa. In 2023, North America accounted for the major share of the flow cytometry market. The Asia Pacific region is likely to grow at significant CAGR during the forecast period owing to various factors such as as increasing investment in healthcare infrastructure, rising R&D activities in life sciences, and growing awareness about personalized medicine are driving this growth. Moreover, countries like China, Japan, India, and South Korea are witnessing substantial adoption of flow cytometry technologies in research, clinical diagnostics, and drug discovery.

The primary interviews conducted for this report can be categorized as follows:

-□By Respondent: Supply Side- 70%, and Demand Side - 30%

-□By Designation (Supply Side): Managers - 45%, CXOs & Directors - 30%, Executives- 25%

-□By Region: North America -40%, Europe -25%, Asia-Pacific -20%, Latin America -10%, MEA- 5%

List of Companies Profiled in the Report:

-□Becton, Dickinson and Company (US)

-□Danaher Corporation (US)

-□Thermo Fisher Scientific Inc. (US)

-□Agilent Technologies, Inc. (US)

-□Sony Corporation (Japan)

-□Bio-Rad Laboratories, Inc. (US)

-□Miltenyi Biotec (Germany)

-□Enzo Biochem, Inc. (US)

-□Sysmex Corporation (Japan)

-□bioMérieux (France)

-□Cytonome/ST, LLC (US)

-□Sartorius AG (Germany)

-□Cytex Biosciences (US)

-□Union Biometrica, Inc. (US)

-□Takara Bio Inc. (Japan)

-□Apogee Flow Systems Ltd. (UK)

-□Stratedigm, Inc. (US)

-□NanoCollect Biomedical, Inc. (US)

-□On-chip Biotechnologies, Co., Ltd. (Japan)

-□Nexcelom Biosciences LLC. (US)

-□BennuBio Inc. (US)

-□Orflo Technologies (US)

-□Bay Biosciences Co., Ltd. (Japan)

-□BioLegend, Inc. (US)

-□CytoBuoy B.V (Netherlands)

Research Coverage:

This report provides a detailed picture of the flow cytometry market. It aims at estimating the size and future growth potential of the market across different segments such as technology, product & services, application, end user, and region. The report also includes an in-depth competitive analysis of the key market players along with their company profiles, recent developments, and key market strategies.

Key Benefits of Buying the Report:

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

The report will help market leaders/new entrants by providing them with the estimations of the revenue numbers for the overall market and its subsegments. It will also help stakeholders better understand the competitive landscape and gain more insights to better position their business and make suitable go-to-market strategies. This report will enable stakeholders to understand the market's pulse and provide them with information on the key market drivers, restraints, opportunities, and challenges.

The report provides insights on the following pointers:

- Analysis of key Drivers (Increasing prevalence of chronic diseases, growing use of flow cytometry in regenerative medicines, Increasing collaborations, strategic partnerships, and alliances among key players, launch of technologically advanced flow cytometry products), restraints (High cost of instruments), opportunities (Increased use in clinical applications and infectious disease diagnostics), and challenges (Complexities related to reagent development) influencing the growth of the market.
- Product Development/Innovation: Detailed insights on newly launched products and technological assessment of the flow cytometry market.
- Market Development: Comprehensive information about lucrative markets the report analyses the market across varied regions.
- Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the flow cytometry market.
- Competitive Assessment: In-depth assessment of market shares of key players, growth strategies, and products offerings of leading players like Becton, Dickinson and Company (US), Danaher Corporation (US), Thermo Fisher Scientific, Inc. (US), Agilent Technologies, Inc. (US), Sony Corporation (Japan), Bio-Rad Laboratories, Inc. (US), Miltenyi Biotec (Germany), Enzo Biochem, Inc. (US), Sysmex Corporation (Japan), bioMerieux (France), Cytonome/ST, LLC (US), Sartorius AG (Germany), Cytex Biosciences (US), Union Biometrica, Inc. (US), Takara Bio Inc. (Japan), Apogee Flow Systems Ltd. (UK), Stratedigm, Inc. (US), NanoCelect Biomedical, Inc. (US), On-chip Biotechnologies, Co., Ltd. (Japan), Nexcelom Biosciences LLC. (US), BennuBio Inc. (US), Orflo Technologies (US), Bay Biosciences Co., Ltd. (Japan), BioLegend, Inc. (US), and CytoBuoy B.V (Netherlands)
