Description

Report Scope

This report covers the worldwide market for the drugs used to treat hematological disorders, as well as the devices and reagents used to diagnose these diseases. Based on product type, the diagnostic market for hematological disorders is divided into reagents & instruments and software. By end user, the market is segmented into hospitals, diagnostic labs, and others. On the basis of drug type, the drugs used to treat hematological disorders are divided into oncology drugs and non-oncology drugs. The market is divided into four geographic regions: North America, Europe, Asia-Pacific, and Rest of the World (RoW). For market estimates, data has been provided for 2023 as the base year, with forecasts for 2024 through 2029. The report also covers approved drugs, the pipeline analysis, innovative research, opportunities within the market, and profiles of leading companies. The growing number of individuals with leukemia is the main reason for the market's growth and the development of more effective drugs.
