### **Report description:**

The global civil engineering market size reached US\$ 9.4 Trillion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 14.4 Trillion by 2032, exhibiting a growth rate (CAGR) of 4.8% during 2024-2032.

Civil engineering refers to the professional practice of planning, designing, building, and maintaining different structures. It is employed in the aerospace industry for designing jetliners, airports, and space stations. It also finds application in the automotive industry for perfecting the load-carrying capacity of a chassis and improving the crashworthiness of bumpers and doors. Nowadays, there is a considerable rise in the need for civil engineers to set up schools, hospitals, private offices, waterways, harbors, seaports, residential structures, and power supply, drinking water, and energy systems across the globe.

#### **Civil Engineering Market Trends:**

With inflating disposable incomes, rapid urbanization and escalating global population, there is a significant rise in the demand for luxury residential properties. This represents one of the vital factors bolstering the civil engineering market growth. Moreover, governments of numerous countries are undertaking projects to develop smart cities and improve existing infrastructure, which is positively influencing the market. Apart from this, several civil engineering companies are adopting connected construction and modularization strategies through innovative technologies to boost operational efficiency and improve productivity. Furthermore, the leading players are entering into public-private partnerships (PPP) to target different business models and accelerate the shift toward digital transformation in construction activities. They are also incorporating advanced materials, such as durable, high-strength concrete, geosynthetics, geotextiles, fire-resistant timbers, and self-healing items. This is anticipated to increase the application of civil engineering in the oil and gas, chemical, power and utility industries around the world.
