- Multi User \$3750.00
- Enterprise User \$5750.00

Report description:

Asia Pacific Biomass Boiler Market will witness 10.2% CAGR between 2024 and 2032. The growth was encouraged by increased training programs for biomass workers led by leading companies and governments. While companies have a strong focus on renewable energy, biomass boilers play an important role in sustainable heat and electricity generation. Leading companies are investing in comprehensive training programs to equip biomass plant operators with the skills necessary for efficient boiler operation, maintenance, and safety.

For instance, in April 2024, as part of the UNDP project funded by the Government of Japan, 150 biomass boiler operators from state institutions across the country received accredited training. The course lasted 40 hours and verified the skills acquired. Practitioners were gradually trained in groups of about 20, and the sessions continued through early fall.

These initiatives not only increase employee productivity but also encourage the adoption of biomass boilers in various applications, including industrial, residential, and commercial. By developing a skilled workforce, companies are increasing confidence in biomass technology, driving market growth, and facilitating the transition to clean energy solutions in Asia Pacific. This emphasis on training underscores the commitment to sustainability and biomass boilers as an important component of the region's renewable energy strategy.

The overall Asia Pacific Biomass Boiler Industry size is classified based on the feedstock, product, application, and country.

The woody biomass segment will undergo rigorous development from 2024 to 2032. Woody biomass derived from trees and agricultural residues is a sustainable fuel source that supports the region's energy diversification goals. Biomass boilers powered

by woody biomass provide an efficient heating and electricity generation solution for businesses, utilities, and residential areas. Wood biomass is becoming a desirable product due to advances in biomass-burning technology and supportive government policies promoting renewable energy. This trend highlights the market growth as Asia Pacific strives to provide sustainable energy solutions to reduce environmental impact and increase energy security.

Asia Pacific biomass boiler market revenue from the commercial segment will register a notable CAGR from 2024 to 2032. Biomass boilers provide industry and commercial organizations with a sustainable alternative for their heating, cooling, and power generation needs. Organic materials such as wood chips, agricultural residues, and forest wastes are used to provide cost-effective and environmentally friendly energy solutions. Commercial industries in Asia Pacific adopt biomass boilers to increase efficiency with greater focus. Government incentives and policies that support market growth remain attractive so that biomass boilers become a key element in the region's strategy to reach growth.

Asia Pacific biomass boiler market from India will showcase a commendable CAGR from 2024 to 2032. Biomass boilers using agricultural residues such as rice husk and bagasse meet India's energy needs in industrial, agricultural, and residential industries. Growing government policies promoting biomass electricity generation and rural electrification are experiencing increased adoption of biomass boilers. They also offer cost-effective solutions, further increasing their use in manufacturing. As India continues to expand its renewable energy capacity, biomass boilers are playing an important role in enhancing energy security and reducing carbon emissions, thereby driving market growth in the region.

Table of Contents:

Report Content

Chapter 1 Methodology & Scope

1.1 Market scope & definitions

1.2 Market estimates & forecast parameters

1.3 Forecast calculation

1.4 Data sources

1.4.1 Primary

1.4.2 Secondary

1.4.2.1 Paid

1.4.2.2 Public

Chapter 2 Executive Summary

2.1 Industry 360 degree synopsis, 2021 - 2032

Chapter 3 Industry Insights

3.1 Industry ecosystem analysis

3.1.1 Vendor matrix

3.2 Regulatory landscape

3.3 Industry impact forces

3.3.1 Growth drivers

3.3.2 Industry pitfalls & challenges

3.4 Growth potential analysis

3.5 Porter's analysis

3.5.1 Bargaining power of suppliers

3.5.2 Bargaining power of buyers

3.5.3 Threat of new entrants

3.5.4 Threat of substitutes

3.6	PESTEL analysis
Chapter 4 Competitive Landscape, 2023	
4.1	Strategic outlook
4.2	Innovation & sustainability landscape
Chapter 5 Market Size and Forecast, By Feedstock (USD Million & Units)	
5.1	Key trends
5.2	Woody biomass
5.3	Agricultural waste
5.4	Industrial waste
5.5	Urban residue
5.6	Others
Chapter 6 Market Size and Forecast, By Product (USD Million & Units)	
6.1	Key trends
6.2	Stocker
6.3	Fluidized bed
Chapter 7 Market Size and Forecast, By Application (USD Million & Units)	
7.1	Key trends
7.2	Residential
7.3	Commercial
7.4	Industrial
Chapter 8 Market Size and Forecast, By Country (USD Million & Units)	
8.1	Key trends
8.2	China
8.3	India
8.4	Philippines
8.5	Japan
8.6	South Korea
8.7	Australia
8.8	Indonesia
Chapter 9 Company Profiles	
9.1	ANDRITZ
9.2	ARITERM
9.3	Babcock & Wilcox Enterprises
9.4	Binder Energietechnik Ges.m.b.H.
9.5	DP CleanTech
9.6	Forbes Marshall
9.7	Hoval
9.8	Hurst Boiler & Welding Co.
9.9	John Wood Group PLC
9.10	Maxtherm Boilers
9.11	Prime Thermals
9.12	Schmid Energy Solutions
9.13	Sofinter S.p.a
9.14	Sugimat
9.15	Thermodyne Boilers
9.16	Treco
9.17	VISSMANN
