Report description:

In 2024, consumer electronics in Turkey is projected to experience a lower volume growth compared to the review period CAGR. This anticipated slowdown follows a period of robust positive growth. In 2023, consumers pre-emptively purchased electronics in anticipation of significant unit price increases expected in 2024 due to hyperinflation. This behaviour is likely to result in a deceleration of sales growth towards the end of the review period.

Euromonitor International's Consumer Electronics in Turkey report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth.
