### **Report description:**

Mobile phones are expected to register a decline in volume sales in the Netherlands in 2024. Despite an improving economic picture and inflation easing, consumers are cautious about spending, and replacement cycles are lengthening. The main reason that consumers replace their phones is if the battery is underperforming or if the model is no longer supported. However, manufacturers of mid- to premium-priced smartphones have extended their support period, with Apple now offering up to seven years.
