Report description:

The market for computers and peripherals in Spain will see a more stable performance in retail volume terms in 2024, following the declines of the previous two years, when a high rate of consumer price inflation dampened demand. However, despite a more positive economic backdrop, the market faces continued challenges, with many categories experiencing a drop in sales. This is partly due to delayed replacement cycles, in light of the high number of post-COVID-19 purchases.

Euromonitor International's Computers and Peripherals in Spain report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth.
