

## **Saudi Arabia Sodium Hypochlorite Market Report by Application (Disinfection and Cleaning, Bleaching, Oxidising, and Others) 2024-2032**

Market Report | 2024-08-10 | 131 pages | IMARC Group

### **AVAILABLE LICENSES:**

- Electronic (PDF) Single User \$3999.00
- Five User Licence \$4999.00
- Enterprisewide License \$5999.00

### **Report description:**

The Saudi Arabia sodium hypochlorite market size reached US\$ 2.3 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 3.5 Million by 2032, exhibiting a growth rate (CAGR) of 4.54% during 2024-2032. Escalating demand for sodium hypochlorite as a disinfectant and bleaching agent, growing awareness about the importance of maintaining proper hygiene and sanitation, the government's initiatives to improve water quality and sanitation facilities, and stringent regulations for wastewater treatment represent some of the key factors driving the market.

Sodium hypochlorite (NaClO) is widely recognized for its versatile applications and powerful disinfecting properties. It is primarily manufactured through the reaction between chlorine gas (Cl<sub>2</sub>) and sodium hydroxide (NaOH) in a controlled process known as chloralkali electrolysis. This process yields a solution of sodium hypochlorite, commonly referred to as bleach, which is widely used as a disinfectant and cleaning agent. When sodium hypochlorite is introduced to water or organic compounds, it dissociates into sodium ions (Na<sup>+</sup>) and hypochlorite ions (ClO<sup>-</sup>). The hypochlorite ions act as potent oxidizing agents, attacking and destroying a wide range of microorganisms, including bacteria, viruses, and fungi. This mechanism of action makes sodium hypochlorite a highly effective sanitizer and disinfectant. One of its primary advantages is its broad-spectrum efficacy, making it effective against a wide range of pathogens. Additionally, it is readily available, cost-effective, and easy to handle and store. Sodium hypochlorite also decomposes relatively quicker, leaving behind harmless byproducts such as salt and water. Currently, it is available in different concentrations and forms, including liquid solutions and solid calcium hypochlorite tablets or granules.

Saudi Arabia Sodium Hypochlorite Market Trends:

The escalating demand for sodium hypochlorite as a disinfectant and bleaching agent in water treatment, healthcare, and agriculture industries represents one of the primary factors creating a positive outlook for the market. Additionally, growing awareness about the importance of maintaining proper hygiene and sanitation, particularly in the wake of the COVID-19 pandemic, has led to an upsurge in the adoption of sodium hypochlorite-based products, which, in turn, is propelling the market growth. Moreover, the Saudi government's initiatives to improve water quality and sanitation facilities, along with stringent regulations for wastewater treatment, are providing a favorable environment for the market growth. Furthermore, the burgeoning

population, coupled with rapid urbanization and industrialization, is supporting the market growth. Apart from this, surging investments in infrastructure development, rising consumer disposable incomes, and the escalating demand for clean and safe drinking water are creating a positive outlook for the market. Furthermore, the easy availability and affordability of sodium hypochlorite products, coupled with advancements in manufacturing techniques, are fueling the market growth. Other factors, such as the rising product usage in the food and beverage (F&B) industry, the growing demand for sodium hypochlorite in the textile sector for bleaching and disinfection applications, and the increasing focus on sustainable and eco-friendly products, are providing an impetus to the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the Saudi Arabia sodium hypochlorite market, along with forecasts at the country levels from 2024-2032. Our report has categorized the market based on application.

Application Insights:

- Disinfection and Cleaning
- Bleaching
- Oxidising
- Others

The report has provided a detailed breakup and analysis of the Saudi Arabia sodium hypochlorite market based on the application. This includes disinfection and cleaning, bleaching, oxidizing, and others. According to the report, disinfection and cleaning represented the largest segment.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the Saudi Arabia sodium hypochlorite market. Detailed profiles of all major companies have been provided. Some of the companies covered include Adwan Chemical Industries Co. Ltd., Basic Chemical Industries, Fouz Chemicals Company, NAMA Chemicals Company, National Company for Sulphur Products (NCSP), Raez Sulphate Factory, SACHLO, TRONOX, etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

- How has the Saudi Arabia sodium hypochlorite market performed so far, and how will it perform in the coming years?
- What are the drivers, restraints, and opportunities in the Saudi Arabia sodium hypochlorite market?
- What is the impact of each driver, restraint, and opportunity on the Saudi Arabia sodium hypochlorite market?
- What is the breakup of the market based on the application?
- Which is the most attractive application in the Saudi Arabia sodium hypochlorite market?
- What is the competitive structure of the Saudi Arabia sodium hypochlorite market?
- Who are the key players/companies in the Saudi Arabia sodium hypochlorite market?

## Table of Contents:

- 1 Preface
- 2 Scope and Methodology
  - 2.1 Objectives of the Study
  - 2.2 Stakeholders
  - 2.3 Data Sources
    - 2.3.1 Primary Sources
    - 2.3.2 Secondary Sources
  - 2.4 Market Estimation
    - 2.4.1 Bottom-Up Approach

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology
- 3 Executive Summary
- 4 Introduction
  - 4.1 Overview
  - 4.2 Key Industry Trends
- 5 Saudi Arabia Sodium Hypochlorite Market
  - 5.1 Market Overview
  - 5.2 Market Performance
  - 5.3 Impact of COVID-19
  - 5.4 Market Forecast
- 6 Market Breakup by Application
  - 6.1 Disinfection and Cleaning
    - 6.1.1 Market Trends
    - 6.1.2 Market Forecast
  - 6.2 Bleaching
    - 6.2.1 Market Trends
    - 6.2.2 Market Forecast
  - 6.3 Oxidising
    - 6.3.1 Market Trends
    - 6.3.2 Market Forecast
  - 6.4 Others
    - 6.4.1 Market Trends
    - 6.4.2 Key Segments
      - 6.4.2.1 Waste Water Treatment
    - 6.4.3 Market Forecast
- 7 SWOT Analysis
  - 7.1 Overview
  - 7.2 Strengths
  - 7.3 Weaknesses
  - 7.4 Opportunities
  - 7.5 Threats
- 8 Value Chain Analysis
- 9 Porters Five Forces Analysis
  - 9.1 Overview
  - 9.2 Bargaining Power of Buyers
  - 9.3 Bargaining Power of Suppliers
  - 9.4 Degree of Competition
  - 9.5 Threat of New Entrants
  - 9.6 Threat of Substitutes
- 10 Saudi Arabia Sodium Hypochlorite Market: Imports
  - 10.1 Trade Data
    - 10.1.1 Import Volume and Value
  - 10.2 Import Tariffs
- 11 Competitive Landscape
  - 11.1 Market Structure
  - 11.2 Key Players

### 11.3 Profiles of Key Players

11.3.1 Adwan Chemical Industries Co. Ltd.

11.3.2 Basic Chemical Industries

11.3.3 Fouz Chemicals Company

11.3.4 NAMA Chemicals Company

11.3.5 National Company for Sulphur Products (NCSP)

11.3.6 Raez Sulphate Factory

11.3.7 SACHLO

11.3.8 TRONOX
