Report description:

Internet Access in Japan

Summary

Internet Access in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- The Internet access market includes all Internet service revenues collected to provide narrowband and broadband Internet access through consumer and business channels. All revenues calculated are retail revenues that are exclusive of taxes. Only fixed communication is included, and mobile phone connections are not considered.
- The Japanese internet access market recorded revenues of \$18.2 billion in 2023, representing a negative compound annual growth rate (CAGR) of 2.7% between 2018 and 2023.
- Market consumption volume increased with a CAGR of 0.7% between 2018 and 2023, to reach a total of 119.8 million internet users in 2023.
- With the evolution of WiMAX technology and the evolution of mobile WiMAX solutions, consumers are potentially shifting away from traditional fixed connections to mobile solutions. The surge in mobile internet usage resulted in a reduction in fixed service revenue and hence the revenues of the internet access market since mobile internet is not part of the fixed communication market.
