**Market Overview**

US Artificial Intelligence (AI) in Mental Health market is anticipated to exhibit a significant CAGR of 23.12% during the review period. AI in mental health refers to the utilization of artificial intelligence (AI) technologies such as machine learning, natural language processing, and data analytics to assist in the diagnosis, treatment, and management of mental health disorders. This involves the development and implementation of AI-powered tools and applications to augment traditional methods of mental

health care delivery.

The increasing incidences of mental illnesses across the US and the shortage of mental health professionals are the major factors driving the growth of global AI in the mental health market. However, the high cost associated with AI in mental health services and products is expected to hamper the growth of the global market. Nevertheless, increasing funding & investment in AI in mental health across the US is anticipated to create lucrative opportunities for the market.

#### Market Segmentation

Based on the component, the US Artificial Intelligence (AI) in Mental Health Market has been segmented into hardware, software solutions and services.

Based on disorder, the market has been segmented into schizophrenia, alcohol use disorders, bipolar disorder, depression, anxiety, and others.

Based on application, the market has been segmented into clinical diagnosis and treatment, patient engagement and education, remote patient monitoring, and others.

Based on technology, the market has been segmented into Natural Language Processing (NLP), Machine Learning (ML), Deep Learning, Others.

Based on end users, the market has been segmented into healthcare providers, corporate organizations, and others.

#### Major Players

The key players operating in the the US Artificial Intelligence (AI) in Mental Health Market are Talkspace Inc., Wysa Ltd, Lyra Health, Inc., Headspace Health, Woebot Health, Muse (Interaxon), TELUS, Cass, and The TouchPoint Solution.
