Report description:

India faces a critical malnutrition challenge amongst children under five years old. While there has been overall improvement in key indicators, the situation remains severe. Seriously malnourished children face weakened immune systems, potentially leading to a shorter lifespan. The economic impact of this is significant, stressing the healthcare system and hindering the country's growth. The highest sales of health and wellness hot drinks were therefore accounted for by the immune support claim...

Euromonitor International's HW Hot Drinks in India report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2019-2023, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2028 illustrate how the market is set to change.
