Report description:

Digital cameras, which accounts for more than three quarters of volume sales of imaging devices in Japan, was in a difficult situation even before the advent of COVID-19. Due to the proliferation of smartphones and improvements in their camera functionality, consumers can take high-quality photos and videos at any time with their ever-present smartphones, therefore significantly reducing the number of consumers who go out of their way to buy a digital camera. Recent smartphone innovations includ...

Euromonitor International's Imaging Devices in Japan report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
