Report description:

Rigid plastics are a versatile, efficient group of packaging materials, which represent more than a quarter of global grocery sales, but which are being increasingly challenged, by consumers and by regulators for their presence in waste. Prioritising efficiency and circularity in plastic packaging designs together with improving end-of-life recovery, recycling and re-use are key, to elevate the environmental profile of plastic and to prevent this resource from becoming waste.

Euromonitor International's Sustainable Packaging: Circularity for Rigid Plastics global briefing offers an insight into to the size and shape of the packaging market, highlights the effect of emerging geographies, categories and consumer trends on the packaging landscape. It identifies the leading pack types, offers strategic analysis of key factors influencing the packaging market - be they packaging innovations, consumption growth, category switching, economic/lifestyle influences, legislation or environmental issues. Forecasts illustrate how the market is set to change and criteria for success.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
