Report description:

ARM Microcontrollers Market

The ARM microcontrollers market was valued at \$10.11 billion in 2023 and is estimated to reach \$19.88 billion by 2032, exhibiting a CAGR of 7.9% from 2024 to 2032.

ARM microcontroller is the integrated circuit embedded in electronic systems to govern their specific operations without requiring complex operating systems. The architecture of ARM microcontrollers is 32-bit. The ARM in ARM microcontroller stands for advanced RISC machine. These microcontrollers are embedded in the computer systems based on reduced instruction set computer (RISC). The key features of ARM microcontrollers are high performance, low power consumption, and enhanced versatility.

Continuous technological advancements and increase in demand for embedded solutions in semiconductor manufacturing are the major drivers of the ARM microcontrollers market. The requirement of these microcontrollers is witnessing a rise as industries are embracing the Internet of Things (IoT), smart appliances, automotive electronics, and industrial automation. In recent times, the adoption of open-source software and hardware platforms is trending in the ARM microcontrollers landscape. These open sources are fostering innovation among developers by providing adaptable tools for prototyping and product development.

However, the upfront costs associated with the manufacturing and enhancement of ARM microcontrollers are high due to substantial investments in R&D, intellectual property licensing, and requirement of semiconductor fabrication facilities. These factors increase product pricing, making the microcontrollers less accessible and restraining market growth. On the contrary, the advent of customization option for ARM microcontrollers specific to the application is presenting novel opportunities for market expansion. These customized circuits cater to the specific requirements of the applications they are designed for. For instance,

Maxim Integrated, an American electronics company, has designed a microcontroller specifically for health wearables.[]

Segment Review[]

The ARM microcontrollers market is segmented into product, application, and region. On the basis of product, the market is divided into less than 80 pins, 80-120 pins, and more than 120 pins. Depending on application, it is classified into automotive, industrial, consumer electronics, telecommunication, medical, and other. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.[]

Key Findings[]

On the basis of product, the 80-120 pins segment was the largest shareholder of the market in 2023.[]

Depending on application, the automotive segment acquired the highest share in the market in 2023.[]

Region wise, Asia-Pacific was the largest revenue generator in 2023.[]

Competition Analysis[]

The major players operating in the ARM microcontrollers market are Microchip, NXP, STMicroelectronics, Texas Instruments, Analog Devices Inc, Toshiba, Cypress Semiconductor, Renesas, Infineon, and Maxim Integrated. These players have adopted various key developmental strategies such as business expansion, new product launches, and partnerships to strengthen their foothold in the market.[]

Additional benefits you will get with this purchase are:

- Quarterly Update and* (only available with a corporate license, on listed price)
- 5 additional Company Profile of client Choice pre- or Post-purchase, as a free update.
- Free Upcoming Version on the Purchase of Five and Enterprise User License.
- 16 analyst hours of support* (post-purchase, if you find additional data requirements upon review of the report, you may receive support amounting to 16 analyst hours to solve questions, and post-sale queries)
- 15% Free Customization* (in case the scope or segment of the report does not match your requirements, 15% is equivalent to 3 working days of free work, applicable once)
- Free data Pack on the Five and Enterprise User License. (Excel version of the report)
- Free Updated report if the report is 6-12 months old or older.
- 24-hour priority response*
- Free Industry updates and white papers.

Possible Customization with this report (with additional cost and timeline, please talk to the sales executive to know more)

- Product Life Cycles
- Supply Chain Analysis & Vendor Margins
- New Product Development/ Product Matrix of Key Players
- Patient/epidemiology data at country, region, global level
- Regulatory Guidelines
- Additional company profiles with specific to client's interest
- Additional country or region analysis- market size and forecast
- Historic market data
- Key player details (including location, contact details, supplier/vendor network etc. in excel format)
- SWOT Analysis
