**Report description:**

Referral Management Market Expected to Garner \$42.8 Billion by 2033, Growing at a CAGR of 17.4%

Abstract: The global referral management market is expected to grow primarily due to the growing focus on preventive care & early intervention. The North America region is predicted to witness profitable growth by 2033.

As per the report published by Research Dive, the global referral management market was valued at \$8.6 billion in 2023 and is expected to register a revenue of \$42.8 billion by 2033 at a CAGR of 17.4% during the forecast period 2024-2033.

Dynamics of the Market

The growing focus on patient-centric care models, increasing emphasis on data analytics & predictive modelling in healthcare, and the rising focus on preventive care & early intervention are expected to make the referral management market a highly profitable one in the forecast period. Besides, referral management allows patients to complete documentation at home, reducing in-office wait times and improving organizational efficiency.

However, according to market analysts, complexity of software and risk of errors & inaccuracies in automated referral processes might restrain the growth of the market.

Integration of AI & machine learning in healthcare processes and the rising need for solutions addressing referral leakage & network optimization present significant opportunities for referral management market growth. Moreover, effective communication about eConsults and automated referral processes can build trust, improve patient engagement, and increase satisfaction.

Key Players of the Market

The major players of the referral management market include GetWellNetwork, CarePort Health, Epic Systems Corporation,
