Report description:

Dermatologicals is expected to register moderate current value growth in the Dominican Republic in 2024, though constant value growth is expected to be muted, as rising prices continue to have an impact on profit margins. The local climate is high in humidity and this leads to common skin conditions such as athletes' foot and ringworm, as well as pityriasis versicolor, which is a fungus caused by the accumulation of moisture from sweat and sweat and damp clothing. This ensures stable demand for...
