Report description:

NRT smoking cessation aids experienced a decline in both value and volume sales in 2024, as smoking prevalence continued to decrease in Denmark. Cigarette sales in Denmark have been steadily declining since 2017, and as the number of smokers decreases, so too does the pool of potential consumers for NRT products. This long-term downward trend in smoking rates has had a direct impact on the demand for smoking cessation aids, resulting in the contraction of this market segment.
