

Hollow Fiber Ultrafiltration Market by Type (Polymeric, Ceramic, Hybrid,), Application (Municipal, Industrial (Pharmaceutical, Chemicals, Oil and Gas)), Region- Global Forecast to 2029

Market Report | 2024-10-01 | 246 pages | MarketsandMarkets

AVAILABLE LICENSES:

- Single User \$4950.00
- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

Report description:

The hollow fiber ultrafiltration market size is projected to rise from USD 2.08 billion in 2024 to USD 4.21 billion by 2029, at a CAGR of 15.2% during the forecast period. The global demand for hollow fiber ultrafiltration is on rise as it effectively removes contaminants such as fungi, viruses, and bacteria from the water ensuring safe water for drinking. The applications of hollow fiber ultrafiltration are applicable in various industries such as food & beverage, pharmaceutical and oil & gas. Hollow fiber ultrafiltration is also used for metal manufacturing for treating processed water as it effectively removes suspended solids, colloids, and microorganisms. This process ensures companies comply with environmental regulations and reduces the environmental impact of their operations.

?PS & PES is projected to be the second largest sub segment by type in terms of value under Polymeric segment.?

PES (Polyethersulfone) owns exceptional properties such as thermal stability, mechanical strength, high flux and chemical resistance that is why it is know to be a high-performance thermoplastic polymer. In hollow fiber ultrafiltration systems, PES is used as the support layer which provides great structural stability to the membrane and facilitates permeate flow. This support layer that is porous in nature allows solvents to pass through it and retains the active layer that performs the separation. The high compaction resistance property of PS (polysulfone) makes it a better material to use under high-pressure conditions. It is stable in aqueous acids and bases and many non-polar solvents; however, it is soluble in dichloromethane and methyl pyrrolidone.

?Food & Beverage accounted for the third largest share in the application sub segment of hollow fiber ultrafiltration market in terms of value under Industrial segment.?

Scotts International. EU Vat number: PL 6772247784

www.scotts-international.com

The food & beverage industry is very competitive and dynamic in nature. In past few years there has been an increase in awareness regarding health amongst humans. Due to this they demand high quality products which are safe and nutritious. Therefor utilizing the right membrane filtration solutions to accomplish these goals is necessary. In this sector utilizing membranes has become a necessity as it helps in manufacturing milk, cheese and whey proteins. Utilizing efficient membrane filtration technology helps this industry's manufacturers to concentrate, clarify, and purify products, including bottled water, juice, and wine. They can also be used for enzyme recovery, processing of cheese whey, and removal of pathogens from milk.

■ Middle East & Africa is the fourth-largest market for hollow fiber ultrafiltration.■

Middle East & Africa holds the fourth-largest market share globally in the hollow fiber ultrafiltration market due to several key factors. The region has less than 1% of water resources for domestic and industrial consumption. Around 5% of the world's population resides in the region, and the regionit has very scarce water resources available, posing a major threat of water scarcity. The growth in population and limited freshwater resources are some of the major reasons for the reuse and recycling of wastewater in the region. Increasing urbanization and improving the Middle East & Africa's business environment will further drive water & wastewater treatment activities. The region has multinational membrane manufacturing companies and innovation firms in water technology.

In-depth interviews were conducted with Chief Executive Officers (CEOs), marketing directors, other innovation and technology directors, and executives from various key organizations operating in the hollow fiber ultrafiltration market, and information was gathered from secondary research to determine and verify the market size of several segments.

■ By Company Type: Tier 1 ? 40%, Tier 2 ? 30%, and Tier 3 ? 30%

■ By Designation: C Level Executives? 20%, Directors ? 10%, and Others ? 70%

■ By Region: North America ? 22%, Europe ? 22%, APAC ? 45% and RoW- 11%

The hollow fiber ultrafiltration market comprises major players such as Pentair (US), Toray Industries, Inc. (Japan), DuPont (US), Hyflux (Singapore), Hydranautics (US), Kovalus Separation Solutions (US), Pall Corporation (US), Veolia (France), Asahi Kasei Corporation (Japan)and Mann+Hummel (Germany). The study includes in-depth competitive analysis of these key players in the hollow fiber ultrafiltration market, with their company profiles, recent developments, and key market strategies.

Research Coverage

This report segments the market for hollow fiber ultrafiltration on the basis of type, application and region provides estimations for the overall value of the market across various regions. A detailed analysis of key industry players has been conducted to provide insights into their business overviews, products & services, key strategies, mergers & acquisitions and investment & expansions associated with the hollow fiber ultrafiltration market.

Key benefits of buying this report

This research report is focused on various levels of analysis ? industry analysis (industry trends), market ranking analysis of top players, and company profiles, which together provide an overall view on the competitive landscape; emerging and high-growth segments of the hollow fiber ultrafiltration market; high-growth regions; and market drivers, restraints, opportunities, and challenges.

The report provides insights on the following pointers:

■ Market Penetration: Comprehensive information on the hollow fiber ultrafiltration market offered by top players in the global hollow fiber ultrafiltration market.

■ Analysis of drivers: (public awareness for clean water necessities, global environmental standards and strong focus on sustainability), restraints (expensive polymers, fouling impacts efficiency and longevity) opportunities (growing water shortages, industrial demand for freshwater), and challenges (fragile, maintenance issues) influencing the growth of hollow fiber

ultrafiltration market.

?□Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product launches in the hollow fiber ultrafiltration market.

?□Market Development: Comprehensive information about lucrative emerging markets ? the report analyzes the markets for hollow fiber ultrafiltration market across regions.

?□Market Capacity: Production capacities of companies producing hollow fiber ultrafiltration are provided wherever available with upcoming capacities for the hollow fiber ultrafiltration market.

?□Competitive Assessment: In-depth assessment of market shares, strategies, products, and manufacturing capabilities of leading players in the hollow fiber ultrafiltration market.

Table of Contents:

1□INTRODUCTION□	24
