Report description:

Analgesics is set to record positive current value growth in Uruguay in 2024. Argentina's exchange rate appreciated in the first quarter of 2024, which immediately impacted prices. Consequently, small-scale illicit trade decreased notably across the first half of 2024, as the attractiveness of buying products in Argentina diminished. As a result, analgesics in Uruguay are now purchased by local retailers, boosting value growth on the landscape.

Euromonitor International's Analgesics in Uruguay report offers a comprehensive guide to the size and shape of the market at a national level.
