Report description:

Since the beginning of the Russian invasion in 2022 there has been a tendency among Ukrainians to spend less on non-essentials in order to save money. Nonetheless, sales of vitamins continue on the path to recovery in 2024 both in current value terms but also retail volume terms. This has been backed in part by an increasing focus on preventative health and a greater awareness of the importance of ensuring a complete nutritional intake, but also due to a slight improvement in the local economy.

Euromonitor International's Vitamins in Ukraine report offers a comprehensive guide to the size and shape of the market at a national level.
