Report description:

South Africa Orthopaedic Braces and Supports Market Report and Forecast 2024-2032

The South Africa orthopaedic braces and supports market stood at a value of around USD 15.4 million in 2023. The market is further expected to grow at a CAGR of 5.30% in the forecast period of 2024-2032 to attain a value of nearly USD 24.5 million by 2027.

South Africa Orthopaedic Braces and Supports Market Analysis

The orthopaedic braces and supports market in South Africa is an essential segment of the country's healthcare industry. These devices are designed to support and protect various parts of the body, including knees, ankles, elbows, wrists, and the spine. They are widely used for injury prevention, post-operative recovery, and managing chronic conditions like arthritis. The market is driven by increasing awareness of the benefits of orthopaedic braces and supports, a growing ageing population, and a rise in sports-related injuries.

Market Drivers

Ageing Population: South Africa's ageing population is a significant driver for the orthopaedic braces and supports market. As people age, they are more prone to musculoskeletal disorders, osteoporosis, and arthritis, increasing the demand for supportive devices.

Sports Injuries: The increasing participation in sports and physical activities has led to a rise in sports-related injuries. Orthopaedic braces and supports are commonly used for injury prevention and rehabilitation, driving market growth.

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

Technological Advancements: Innovations in materials and design have led to the development of more comfortable, durable, and effective braces and supports. These advancements have increased the adoption of these devices among patients and healthcare professionals.

Awareness and Education: Growing awareness and educational initiatives about the benefits of orthopaedic braces and supports among patients and healthcare providers have contributed to market growth. Improved marketing strategies by manufacturers have also played a role.

Market Challenges

High Costs: The cost of advanced orthopaedic braces and supports can be prohibitive for many South Africans, particularly in low-income communities. This cost barrier limits access to these essential devices.

Limited Reimbursement Policies: The lack of comprehensive reimbursement policies for orthopaedic braces and supports in the public healthcare sector can hinder market growth. Patients often have to bear the full cost of these devices out-of-pocket.

Lack of Awareness in Rural Areas: While awareness has increased in urban areas, rural regions still face a lack of information about the availability and benefits of orthopaedic braces and supports. This disparity affects market penetration in these areas.

Supply Chain Issues: The orthopaedic braces and supports market in South Africa can be affected by supply chain disruptions, which impact the availability and timely delivery of products. This challenge has been exacerbated by global events such as the COVID-19 pandemic.

Future Opportunities

Market Expansion: There is significant potential for market expansion in rural and underserved areas through targeted awareness campaigns and distribution networks. Enhancing accessibility in these regions can drive future growth.

Product Innovation: Continued investment in research and development to create more advanced and cost-effective orthopaedic braces and supports will open new opportunities. Innovations that focus on patient comfort, mobility, and convenience are likely to be well-received.

Telemedicine and E-commerce: The rise of telemedicine and e-commerce platforms presents an opportunity to reach a broader audience. Online consultations and sales can make it easier for patients to access orthopaedic braces and supports from the comfort of their homes.

Collaborations and Partnerships: Collaborations between manufacturers, healthcare providers, and insurance companies can improve reimbursement policies and reduce costs for patients. Partnerships with sports organisations and rehabilitation centres can also drive market growth.

South Africa Orthopaedic Braces and Supports Market Trends

The South Africa orthopaedic braces and supports market is experiencing notable growth due to increasing demand for preventive and therapeutic solutions for musculoskeletal conditions. This market is driven by advancements in product innovation and a growing focus on overall health and wellness.

Market Trends

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

Rising Popularity of Customised Braces and Supports The demand for customised orthopaedic braces and supports is on the rise, as patients seek tailored solutions that offer better fit, comfort, and effectiveness. Customisation involves using 3D scanning and printing technologies to create braces that match the specific anatomy of the patient, resulting in improved patient outcomes and satisfaction.

Integration of Smart Technologies The integration of smart technologies into orthopaedic braces and supports is an emerging trend. These smart braces come equipped with sensors and IoT capabilities that monitor the patient's movement and provide real-time feedback. This data can be used by healthcare providers to track recovery progress and make informed adjustments to the treatment plan.

Focus on Lightweight and Breathable Materials Manufacturers are increasingly focusing on developing orthopaedic braces and supports using lightweight and breathable materials. These materials enhance patient comfort and compliance, particularly for long-term use. Innovations in material science, such as the use of advanced polymers and breathable fabrics, are driving this trend.

Increased Adoption of Preventive Braces There is a growing awareness of the benefits of using orthopaedic braces and supports for preventive purposes, particularly among athletes and physically active individuals. Preventive braces are designed to provide additional support and stability, reducing the risk of injuries during sports and physical activities.

Expansion of Distribution Channels The expansion of distribution channels, including e-commerce platforms, is making orthopaedic braces and supports more accessible to a wider population. Online sales channels offer convenience and a broader selection of products, which is particularly beneficial for patients in remote or underserved areas.

Collaborations and Partnerships Collaborations between orthopaedic brace manufacturers and healthcare providers are becoming more common. These partnerships aim to enhance product development, improve patient education, and streamline the supply chain. Joint ventures and strategic alliances are also helping companies to expand their market presence and reach.

Emphasis on Rehabilitation and Post-operative Care The role of orthopaedic braces and supports in rehabilitation and post-operative care is gaining prominence. These devices are increasingly being prescribed as part of comprehensive rehabilitation programmes to ensure optimal recovery and prevent re-injury. The focus on post-operative care is driving demand for high-quality, durable, and effective braces and supports.

South Africa Orthopaedic Braces and Supports Market Segmentation

Market Breakup by Product

Lower Extremity Braces and Supports

Upper Extremity Braces and Supports

Spinal Braces and Supports

The South Africa orthopaedic braces and supports market is segmented into lower extremity braces, upper extremity braces, and spinal braces. Lower extremity braces are driven by the rise in sports injuries and increasing geriatric population, promoting mobility and reducing pain. Upper extremity braces are seeing growth due to the prevalence of arthritis and upper limb fractures. Spinal braces benefit from advancements in ergonomic designs for spinal conditions. These segments are poised to drive market

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

growth through technological innovations and increased awareness. Future growth is expected as these products become more accessible, affordable, and integrated into preventive and rehabilitative healthcare.

Market Breakup by Type

Soft and Elastic Braces and Supports

Hinged Braces and Supports

Hard and Rigid Braces and Supports

The South Africa orthopaedic braces and supports market is segmented by type into soft and elastic braces, hinged braces, and hard and rigid braces. Soft and elastic braces are driven by their comfort and versatility for minor injuries and preventive use. Hinged braces are gaining traction for providing stability and support in moderate to severe injuries, particularly in sports and post-operative recovery. Hard and rigid braces are essential for immobilising and stabilising serious conditions and fractures. These segments are set to drive market growth with technological advancements, increasing injury awareness, and expanding applications in preventive and therapeutic care during the forecast period.

Market Breakup by Application

Ligament Injury

Preventive Care

Post-Operative Rehabilitation

Osteoarthritis

Others

The South Africa orthopaedic braces and supports market, segmented by application, includes ligament injury, preventive care, post-operative rehabilitation, osteoarthritis, and others. Ligament injury braces are driven by high sports participation and associated injuries. Preventive care braces see growth from rising health awareness and the desire to avoid injuries. Post-operative rehabilitation braces are essential for ensuring proper recovery and mobility post-surgery. Osteoarthritis braces cater to the growing ageing population and the need for pain management and mobility support. Other applications, including congenital conditions and general musculoskeletal support, also contribute. These segments are poised to drive market growth through increased adoption and technological advancements.

Market Breakup by End User

Hospitals and Surgical Centers

Orthopedic Clinics

Trauma Centers

Others

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

The South Africa orthopaedic braces and supports market, segmented by end user, includes hospitals and surgical centres, orthopaedic clinics, trauma centres, and others. Hospitals and surgical centres drive demand with their comprehensive care facilities and post-operative requirements. Orthopaedic clinics see growth from specialised treatment and rehabilitation services. Trauma centres cater to acute injury cases, enhancing the need for immediate support and stabilisation. Other end users, including home care settings and sports rehabilitation centres, contribute to market expansion. These segments are poised to drive market growth through increasing patient inflow, specialised care needs, and the rising prevalence of musculoskeletal conditions.

South Africa Orthopaedic Braces and Supports Market Competitive Landscape

The competitive landscape of the South Africa orthopaedic braces and supports market features prominent players such as Ottobock SE & Co. KGaA, Enovis Corp, Ossur hf, Du Toit Orthopaedics Inc, Medtronic plc, Stryker Corporation, and DePuy Synthes. These companies engage in various market activities to strengthen their positions, including mergers and acquisitions to expand their market share and capabilities. Research initiatives focus on developing innovative and advanced braces and supports to meet growing demand. Product introductions often feature new materials and technologies enhancing comfort and effectiveness. Partnerships with healthcare providers and institutions help in expanding reach and improving service delivery.

?

Key Questions Answered in the Report

What is the current and future performance of the South Africa orthopaedic braces and supports market?

What are the main challenges facing the South Africa orthopaedic braces and supports market?

What are the key drivers of the South Africa orthopaedic braces and supports market?

What emerging trends are shaping the future of the South Africa orthopaedic braces and supports market?

How is customisation with 3D printing improving orthopaedic braces and supports effectiveness?

How are ligament injury and preventive care braces driving growth in the South Africa market?

How do hospitals and surgical centres drive demand

How do mergers and acquisitions impact the growth of the South Africa orthopaedic braces market?

Key Benefits for Stakeholders

The industry report offers a comprehensive quantitative analysis of various market segments, historical and current market trends, market forecasts, and dynamics of the South Africa orthopaedic braces and supports market from 2017-2032.

The research report provides the latest information on the market drivers, challenges, and opportunities in the South Africa orthopaedic braces and supports market.

The study maps the leading, as well as the fastest-growing, regional markets. It further enables stakeholders to identify the key country-level markets within each region.

Porter's five forces analysis assists stakeholders in assessing the impact of new entrants, competitive rivalry, supplier power, buyer power, and the threat of substitution. It helps stakeholders to analyze the level of competition within the South Africa orthopaedic braces and supports industry and its attractiveness.

The competitive landscape allows stakeholders to understand their competitive environment and provides insight into the current positions of key players in the market.

Table of Contents:

- 1□Preface
- 1.1□Objectives of the Study
