

U.S. Hand Tools Market Research Report 2020-2029

Market Report | 2024-10-28 | 136 pages | Arizton Advisory & Intelligence

AVAILABLE LICENSES:

- Single User License \$2500.00
- Team License \$3000.00
- Enterprisewide \$3500.00

Report description:

The U.S. hand tools market is expected to grow at a CAGR of 3.82% from 2023 to 2029.

MARKET TRENDS & DRIVERS

Growing Adoption of Sustainable Products

Environmental problems are growing significantly due to rising carbon emissions and climate change. Growing consumer awareness substantially drives the use of products that minimize environmental impact and promote healthy surroundings. Manufacturers in the U.S. hand tools market are increasingly focusing on producing tools made from recycled or eco-friendly materials to meet the demand for sustainability. As environmentally conscious consumers seek greener alternatives, the market is expected to see more products, such as bamboo-handled hammers, that emphasize sustainability. Reducing packaging and opting for minimal, recyclable options is becoming a standard practice among hand tool manufacturers. For instance, Stanley Black & Decker has introduced its ECOSMART initiative, which is focused on reducing environmental impact through several efforts, including sustainable manufacturing, material sourcing, and product design.

Advancement in Hand Tool Materials

The use of cutting-edge materials like carbon fiber composites and advanced alloys is significantly boosting the durability of hand tools. These materials are designed to provide greater strength and longevity, making them especially suitable for high-demand industries such as construction, mining, and aerospace. The shift from traditional, heavier materials like steel and iron to lightweight alternatives such as carbon fiber and composite alloys is transforming the U.S. hand tools market. These materials enhance portability, reduce fatigue, and allow for greater control and precision during use. The lightweight nature of modern hand tools enables better maneuverability, allowing users to handle them with greater control and precision. This is particularly important in sectors like automotive and aerospace where precision is critical. Stanley Black & Decker one of the leading manufacturers has incorporated carbon fiber in some of the hand tools which helps in the reduction of overall weight.

INDUSTRY RESTRAINTS

Rise in Automation and Power Tools

The growing use of automated tools, power tools, and machinery in sectors like construction and manufacturing is diminishing the need for traditional hand tools. Power tools offer more efficiency and speed, making them preferable for several tasks. Over the last decade, one of the most prominent growth enhancers for the cordless power tool segment has been associated with the development of Li-ion batteries. Power tools, which include machinery such as drills, grinders, impact wrenches, nut runners, saws, heat guns, and others, are witnessing significant growth in the region. The recent development of power tools in heavy-duty applications such as rotary hammers, demolition hammers, and reciprocating saws further increases the burden for hand tool vendors as these tools are more sophisticated, safe, and reliable.

SEGMENTATION INSIGHTS

INSIGHTS BY TOOL TYPE

The general-purpose tool type segment dominates the U.S. hand tools market. The segment consists of the most commonly used tools such as wrenches, screwdrivers & nut drivers, pliers, hammers, riveters, clamps & vises, wrecking bars, ratchets, and pry bars. The general-purpose tool segment is estimated to grow, led by the ongoing trends in home improvement, professional demand, and industrial needs. Renovation retrofit and home improvement activities are expected to contribute to the growth of the segment during the forecast period. As industries like construction and automotive repair thrive and as DIY activities increase, these tools will remain fundamental to both professionals and homeowners across the US. Their demand is driven by a combination of professional use, growing DIY trends, and advancements in tool design. Among all the general-purpose tools, pliers are multi-purpose hand tools extensively used for bending, cutting, and gripping. Alongside screwdrivers and wrenches, pliers are essential components in every basic toolbox.

Segmentation by Tool Type

- General Purpose Tools
 - o□ Pliers
 - o□ Wrenches
 - o□ Screwdrivers & Nutdrivers
 - o□ Hammers
 - o□ Wrecking Bars
 - o□ Riveters
 - o□ Clamps & Vises
 - o□ Ratchets & Sockets
- Cutting Tools
 - o□ Saws
 - o□ Chisel & Files
 - o□ Knives & Blades
 - o□ Cable & Wire Cutting Tools
- Taps & Dies
- Layout & Measuring Tools

INSIGHTS BY END-USER

www.scotts-international.com

The U.S. hand tools market by end-user is segmented into industrial, commercial, and residential. The industrial segment holds the most significant market share. Hand tools are widely used across industries such as automotive, aerospace, electronics, energy, construction, and shipbuilding. The construction sector is estimated to generate the highest revenue, driven by rising construction and renovation activities across the region, followed by the automotive industry, which involves the assembly of high-precision parts. The number of housing permits issued serves as a key indicator of residential construction activity. In Q1 2024, housing permits saw a 4.4% year-on-year increase, indicating growing demand for hand tools in residential construction. Additionally, the aerospace end-user industry is expected to grow at the fastest CAGR in the U.S. hand tools market during the forecast period, fueled by the demand for sophisticated precision pliers and cutters, allowing hand tool vendors to compete effectively with the power tool market. In 2023, United States' new light-vehicle sales reached 15.5 million units-a 13.1% increase from 2022 and the highest total since 2019.

 - o ☐ Construction
 - o ☐ Automotive
 - o ☐ Aerospace
 - o ☐ Electronics
 - o ☐ Energy
 - o ☐ Shipbuilding
 - o ☐ Others
- ☐ Commercial
- ☐ Residential

REGIONAL ANALYSIS

The Southern U.S. holds a notable share of the U.S. hand tools market due to its large population base and rapid growth in sectors such as housing, real estate, tourism, and hospitality. The region, including states like Texas, Arizona, and South Carolina, experienced a surge in new residential construction of around 0.5%, 0.8%, and 0.6% respectively in Q1 2024 as compared to Q1 2023. This rise in housing units is a major drive for the increased demand for hand tools used in construction, renovation, and maintenance. Additionally, many Southern homeowners actively participate in DIY home improvement projects, further boosting demand for general-purpose hand tools such as wrenches, screwdrivers, and hammers. Florida, in particular, stands out with its strong DIY culture, where both retirees and younger homeowners take on various renovation tasks, driving hand tool sales. Moreover, the Southern United States has a high number of car owners, making automotive repair a significant market for hand tools. States like Texas and Georgia serve as key automotive hubs, where tools like ratchets, pliers, and socket sets are essential for mechanics and repair professionals to maintain and service vehicles. This reliance on automotive repair, coupled with the region's infrastructure growth, continues to fuel demand for hand tools across multiple sectors.

Region

- ☐ The U.S.
 - o ☐ South
 - o ☐ West
 - o ☐ Northeast
 - o ☐ Midwest

COMPETITIVE LANDSCAPE

The U.S. hand tools market is highly competitive and marked by low market concentration, with numerous players vying for market share. Major companies like Stanley Black & Decker, Emerson, Apex Tool Group, Snap-on, and TTI dominate the U.S. hand tools market, but they face competition from various local manufacturers who produce tools catering to regional demands and regulations. To maintain a competitive edge, vendors are focusing on enhancing their value propositions, including developing new patented designs and ergonomic solutions that appeal to both professionals and DIY consumers. As competition intensifies, there is a growing emphasis on innovation, with new product extensions and tool enhancements expected to drive growth in the coming years. For instance, companies like TTI and Stanley Black & Decker are developing tools specifically designed for DIY enthusiasts, in response to the rise of home improvement activities.

As the competition increases in the U.S. hand tools market, key differentiators like durability, safety features, tool performance, pricing, and customization will become critical factors for success. Global players' increased presence will likely make it more challenging for smaller regional vendors to maintain their market share, pushing them to innovate or collaborate to stay relevant in this fast-evolving landscape.

Key Vendors

- [X] Apex Tool Group
- [X] Emerson
- [X] Snap-on
- [X] Stanley Black & Decker
- [X] Techtronic Industries

Other Prominent Vendors

- [X] Bojo Tools
