- Multi User \$5350.00
- Enterprise User \$8350.00

Report description:

The Global Food Acidulants Market, valued at USD 6.39 billion in 2023, is projected to expand at a CAGR of 6.3% from 2024 to 2032. This growth is largely driven by the increasing demand for acid regulators within the beverage sector, especially for products like flavored water, energy drinks, and sparkling beverages. Acidulants offer essential qualities that appeal to beverage manufacturers, such as enhancing palatability, sensory experience, and nutritive value, which attracts consumers and boosts market demand.

Consumers' growing preference for natural and healthier food choices fuels the market. Trends like clean label movements and regulatory support promote the use of organic acidulants, such as citric and malic acids. Additionally, innovations in product formulations and a focus on sustainable sourcing are shaping industry development. As the food and beverage market expands, particularly in emerging regions, there is a growing focus on strategic partnerships and technological advancements that enhance product offerings and help companies capture market share.

The acetic acid segment alone is expected to reach USD 4.32 billion by 2032, with a CAGR of 5.9%. Citric acid continues to be a market leader due to its versatile applications in preservation and flavor enhancement, while lactic acid is becoming increasingly popular as a natural preservative in food products. Fumaric and malic acids are also gaining traction for their roles in regulating acidity and enhancing flavor profiles. Meanwhile, acids like phosphoric acid maintain steady demand in various segments due to their use in different consumable products. Market growth is further propelled by an increased consumer focus on high-quality consumables.

The beverages application segment, which held a 50.1% market share in 2023 at USD 3.18 billion, is set to grow at a 6.6% CAGR over the forecast period. In the bakery sector, acidulants are widely used due to their role in enhancing shelf life, improving texture, and offering heat resistance. Rising urbanization and a growing working population have led to an increased demand for bakery products, driving the need for acidulants. However, regulatory restrictions on acid usage levels set by organizations like the FDA and EFSA can raise compliance costs, which may impact market profitability.

The Asia Pacific market is anticipated to reach USD 3.22 billion by 2032, growing at a CAGR of 7.1%. Factors such as the rising demand for canned products, advancements in organized retail, and increased production of acidulants in Asia are driving

regional growth. Additionally, heightened consumer awareness regarding clean-label products is expected to stimulate demand for acidulants across various sectors.

Table of Contents:

Report Content

Chapter 1 Methodology & Scope

- 1.1 Market scope & definition
- 1.2 Base estimates & calculations
- 1.3 Forecast calculation
- 1.4 Data sources
 - 1.4.1 Primary
 - 1.4.2 Secondary
 - 1.4.2.1 Paid sources
 - 1.4.2.2 Public sources

Chapter 2 Executive Summary

2.1 Industry 360 synopsis

Chapter 3 Industry Insights

- 3.1 Industry ecosystem analysis
 - 3.1.1 Key manufacturers
 - 3.1.2 Distributors
 - 3.1.3 Profit margins across the industry
- 3.2 Industry impact forces
 - 3.2.1 Growth drivers
 - 3.2.1.1 Growth in beverage industry may fuel food acidulants demand
 - 3.2.1.2 Rising consumption of processed meat will stimulate industry growth
 - 3.2.1.3 Growing convenience food products demand is likely to favor food acidulants industry growth
 - 3.2.1.4 Expanding organized food retail sector will foster market growth
 - 3.2.2 Market challenges
 - 3.2.2.1 Growing health concerns regarding phosphoric acid
 - 3.2.2.2 Stringent food safety regulations may lead to high compliance cost
 - 3.2.3 Market opportunity
 - 3.2.3.1 New opportunities
 - 3.2.3.2 Growth potential analysis
- 3.3 Raw material landscape
 - 3.3.1 Manufacturing trends
 - 3.3.2 Technology evolution
 - 3.3.2.1 Sustainable manufacturing
 - 3.3.2.1.1 Green practices
 - 3.3.2.1.2 Decarbonization
 - 3.3.3 Sustainability in raw materials
 - 3.3.4 Pricing trends (USD/Ton), 2021 - 2032
 - 3.3.4.1 North America
 - 3.3.4.2 Europe
 - 3.3.4.3 Asia Pacific
 - 3.3.4.4 Latin America
 - 3.3.4.5 Middle East & Africa

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

3.4 Regulations & market impact

3.5 Porter's analysis

3.6 PESTEL analysis

Chapter 4 Competitive Landscape, 2023

4.1 Company market share analysis

4.2 Competitive positioning matrix

4.3 Strategic outlook matrix

Chapter 5 Market Size and Forecast, By Product, 2021-2032 (USD Billion, Tons)

5.1 Key trends

5.2 Citric acid

5.3 Lactic acid

5.4 Fumaric acid

5.5 Acetic acid

5.6 Phosphoric acid

5.7 Tartaric acid

5.8 Malic acid

Chapter 6 Market Size and Forecast, By Application, 2021-2032 (USD Billion, Tons)

6.1 Key trends

6.2 Bakery & confectionery

6.3 Food & nutrition

6.4 Beverages

6.5 Dairy & frozen desserts

6.6 Sauces & dressing

6.7 Others

Chapter 7 Market Size and Forecast, By Region, 2021-2032 (USD Billion, Tons)

7.1 Key trends

7.2 North America

7.2.1 U.S.

7.2.2 Canada

7.3 Europe

7.3.1 Germany

7.3.2 UK

7.3.3 France

7.3.4 Italy

7.3.5 Spain

7.4 Asia Pacific

7.4.1 China

7.4.2 India

7.4.3 Japan

7.4.4 South Korea

7.4.5 Australia

7.5 Latin America

7.5.1 Brazil

7.5.2 Mexico

7.6 MEA

7.6.1 Saudi Arabia

7.6.2 UAE

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

7.6.3 South Africa

Chapter 8 Company Profiles

8.1 ADM

8.2 Univar Inc

8.3 Cargill

8.4 Brenntag

8.5 Tate & Lyle

8.6 Parchem Trading

8.7 Purac Biochem

8.8 Caremoli

8.9 Jungbunzlauer Suisse

8.10 Bartek Ingredients
