Report description:

Palm oil remains the primary oil consumed in Ecuador in 2024, benefiting from the country's extensive national production capacity. However, this industry has faced significant challenges, particularly with the emergence of a pest known as "bud rot," which has disrupted local production. Ecuador's unique geography also plays a notable role in how palm oil is distributed and used across regions. In coastal areas, pure palm oil is widely marketed, while in the Andean region, the oil solidifies due...
