Biofuel Consumption in North America

**Summary**

Biofuel Consumption in North America industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

**Key Highlights**

- Biofuels are renewable energy sources produced from organic materials or biomass. Biofuels help in reducing greenhouse gas emissions and are therefore used as a substitute for fossil fuels such as gasoline and diesel. Market volume represents consumption of biofuel in a country in a specific year. Market value is calculated by multiplying market volume with wholesale price of biofuel.
- The North American biofuel consumption market recorded revenues of \$55.5 billion in 2023, representing a compound annual growth rate (CAGR) of 5.0% between 2018 and 2023.
- Market consumption volumes declined with a negative CAGR of 0.7% between 2018 and 2023, to reach a total of 426.9 million barrel in 2023.
- The value market growth during 2018-2023 is attributed to government policies and regulations, environmental concerns and climate change, technological advancements, increasing demand for sustainable fuels in transportation, and growing concern for energy security.

**Scope**

- Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the biofuel
