Report description:

Flexible plastic remains the preferred pack type in dried baby food packaging in China due to its numerous advantages that align with consumer needs and market demands. This packaging type offers superior barrier properties, ensuring the preservation of nutritional content and freshness, which is critical for baby food products. In addition, flexible plastic is lightweight and easy to handle, making it convenient for parents who need to store and transport baby food. The packaging's versatility...

Euromonitor International's Baby Food Packaging in China report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
