Report description:

Flexible aluminium/plastic, which is the dominant pack type used in hot drinks packaging in South Africa, continued to record strong unit volume growth in this industry in 2023. Flexible aluminium/plastic packaging is seen as providing superior protection for hot drinks, helping to maintain the quality and freshness of the product. This is particularly important for products like coffee, which can quickly lose flavour and aroma if not stored properly. Flexible aluminium/plastic packaging is also...

Euromonitor International's Hot Drinks Packaging in South Africa report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
