Report description:

South Africa's population with an overweight or obesity diagnosis is on the rise. According to Euromonitor International's Economies and Consumers data, 26% of the over 18-year-old population of South Africa was overweight (BMI 25-30kg/sq m) in 2023, whilst 30% was obese (BMI 30kg/sq m or more). Approximately 26% of both males and females were overweight in the same year, with 18% and 43% respectively classed as obese. Meanwhile, around 53% of the adult population took part in insufficient physi...

Euromonitor International's HW Dairy Products and Alternatives in South Africa report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2019-2023, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2028 illustrate how the market is set to change.

Product coverage: HW Baby Food, HW Dairy, HW Dairy Products and Alternatives by Type.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
