Report description:

The demographic landscape in Indonesia is being shaped by its expanding population, high birth rate, large youth cohort and urbanisation. Spending patterns are being shaped by a generational shift, as consumer preferences move towards personalised and tech-driven solutions. Going forward, the influence of Gen Z and their demands will increase. Households with children will remain dominant, driving demand for family-orientated goods.

Euromonitor's Indonesia: Consumer Profile report analyses factors influencing national consumer expenditure. Consumer lifestyles reports include coverage of: population, urban development, home ownership, household profiles, labour, income, consumer and family expenditure, health, education, eating habits, drinking habits, shopping habits, personal grooming, clothing, leisure habits, savings and investments, media, communication, transport and travel and tourism. Use this report to understand the factors influencing a nation's lifestyle choices.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
