Report description:

In the highly challenging years of 2022-2023, the consumption of tea in Hungary suffered heavily from price increases, amid higher costs of packaging materials and logistics and high inflation. In 2024, as the rate of inflation and price rises eased, off-trade and total volume sales of tea declined at a much slower rate. While on-trade volume sales continued to recover from the hit taken in the wake of Coronavirus (COVID-19), this was insufficient to see total volume sales return to positive growth.
