Report description:

Coffee is set to see retail value sales increase in current terms in Malaysia in 2024, though retail volume sales are expected to fall during the year. Coffee bean prices surged as a result of the poor harvest in Vietnam due to extreme weather and hikes in transportation costs in Brazil. Indeed, such developments have led to calls for Malaysia to pay greater attention to developing its own local coffee growing capabilities.

Euromonitor International's Coffee in Malaysia report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2019-2023, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they legislative, distribution or pricing issues. Forecasts to 2028 illustrate how the market is set to change.
