

**Aviation Crew Management System Market Report by Solution (Hardware, Software, Services), Deployment (Cloud-based, On-premises), Application (Crew Planning, Crew Training, Crew Services, Crew Operations), and Region 2025-2033**

Market Report | 2025-01-18 | 139 pages | IMARC Group

**AVAILABLE LICENSES:**

- Electronic (PDF) Single User \$2999.00
- Five User Licence \$3999.00
- Enterprisewide License \$4999.00

**Report description:**

The global aviation crew management system market size reached USD 2.6 Billion in 2024. Looking forward, IMARC Group expects the market to reach USD 4.7 Billion by 2033, exhibiting a growth rate (CAGR) of 6.9% during 2025-2033. The increasing demand for air travel, the need for improved operational efficiency, and the growing adoption of cloud-based solutions, represent some of the key factors driving the market.

Aviation crew management system (CMS) refers to a software tool used by airlines to manage and optimize the scheduling and assignment of their flight crews. It allows airlines to effectively plan crew resources based flight schedules, crew availability, and regulatory requirements. The CMS typically includes features such as crew rostering, training management, and crew tracking, and can help airlines to improve operational efficiency, reduce costs, and enhance crew satisfaction. Aviation CMS is designed to support all types of crew members, including pilots, cabin crew, and ground staff. It enables airlines to quickly adapt to crew availability or scheduling changes, while also ensuring that they comply with regulatory requirements such as maximum duty times and rest periods. Additionally, it provides real-time information to crew members, allowing them to view their schedules, receive alerts, and communicate with other crew members. In recent years, aviation CMS has played a critical role in ensuring that airlines are able to efficiently manage their crew resources and provide a positive experience for crew members and passengers alike.

**Aviation Crew Management System Market Trends:**

One of the primary factors driving the market is the significant increase in the number of flights due to rising disposable incomes, and growing urbanization and globalization. This has led to an increasing demand for air travel, which in turn, has created a need for more efficient crew management systems. Additionally, airlines are under pressure to improve their operational efficiency to

[www.scotts-international.com](http://www.scotts-international.com)

remain competitive. The use of a crew management system helps airlines optimize crew utilization, reduce crew costs, and minimize disruptions caused by crew scheduling issues. Other than this, the adoption of cloud-based solutions is also driving the market as these solutions offer several advantages, including lower costs, greater flexibility, and improved scalability, over traditional on-premise solutions. Besides this, regulatory requirements, such as the need to comply with crew duty and rest requirements, are also resulting in the adoption of crew management systems. These systems help airlines to ensure that they comply with regulations, thus reducing the risk of fines and other penalties. Moreover, several airlines are focusing on deploying crew management systems to help airlines ensure that the right crew members are assigned to each flight, thereby improving the overall passenger experience.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global aviation crew management system market, along with forecasts at the global, regional, and country levels from 2025-2033. Our report has categorized the market based on the solution, deployment, and application.

#### Solution Insights:

- Hardware
- Software
- Services

The report has provided a detailed breakup and analysis of the aviation crew management system market based on the solution. This includes hardware, software, and services. According to the report, software represented the largest segment.

#### Deployment Insights:

- Cloud-based
- On-premises

A detailed breakup and analysis of the aviation crew management system market based on the deployment has also been provided in the report. This includes cloud-based and on-premises. According to the report, cloud based accounted for the largest market share.

#### Application Insights:

- Crew Planning
- Crew Training
- Crew Services
- Crew Operations

The report has provided a detailed breakup and analysis of the aviation crew management system market based on the application. This includes crew planning, crew training, crew services, and crew operations. According to the report, crew planning represented the largest segment.

#### Regional Insights:

- North America
- United States

tel. 0048 603 394 346 e-mail: [support@scotts-international.com](mailto:support@scotts-international.com)

[www.scotts-international.com](http://www.scotts-international.com)

Canada  
Asia-Pacific  
China  
Japan  
India  
South Korea  
Australia  
Indonesia  
Others  
Europe  
Germany  
France  
United Kingdom  
Italy  
Spain  
Russia  
Others  
Latin America  
Brazil  
Mexico  
Others  
Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Europe (Germany, France, the United Kingdom, Italy, Spain, and others); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America was the largest market for aviation crew management system. Some of the factors driving the North America aviation crew management system market included increasing demand for efficient crew management, advancements in aviation technology, and rising demand for air travel.

#### Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global aviation crew management system market. Detailed profiles of all major companies have also been provided. Some of the companies covered include AIMS Inc., Blue One Management S.A., CAE Inc., Fujitsu Limited, Hexaware Technologies Limited (HT Global IT Solutions Holdings Limited), IBS Software Private Limited (IBS Software Pte. Ltd.), IntelliSys Aviation Systems Inc., Jeppesen, Lufthansa Systems GmbH & CO. KG (Deutsche Lufthansa AG), Maureva Ltd., Navblue (Airbus SE), PDC A/C (Prolog Development Center Holding A/S), etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

#### Key Questions Answered in This Report:

How has the global aviation crew management system market performed so far, and how will it perform in the coming years?  
What are the drivers, restraints, and opportunities in the global aviation crew management system market?  
What is the impact of each driver, restraint, and opportunity on the global aviation crew management system market?  
What are the key regional markets?  
Which countries represent the most attractive aviation crew management system market?  
What is the breakup of the market based on the solution?  
Which is the most attractive solution in the aviation crew management system market?  
What is the breakup of the market based on the deployment?

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: [support@scotts-international.com](mailto:support@scotts-international.com)

[www.scotts-international.com](http://www.scotts-international.com)

Which is the most attractive deployment in the aviation crew management system market?  
What is the breakup of the market based on application?  
Which is the most attractive application in the aviation crew management system market?  
What is the competitive structure of the global aviation crew management system market?  
Who are the key players/companies in the global aviation crew management system market?

## **Table of Contents:**

1	Preface
2	Scope and Methodology
2.1	Objectives of the Study
2.2	Stakeholders
2.3	Data Sources
2.3.1	Primary Sources
2.3.2	Secondary Sources
2.4	Market Estimation
2.4.1	Bottom-Up Approach
2.4.2	Top-Down Approach
2.5	Forecasting Methodology
3	Executive Summary
4	Introduction
4.1	Overview
4.2	Key Industry Trends
5	Global Aviation Crew Management System Market
5.1	Market Overview
5.2	Market Performance
5.3	Impact of COVID-19
5.4	Market Forecast
6	Market Breakup by Solution
6.1	Hardware
6.1.1	Market Trends
6.1.2	Market Forecast
6.2	Software
6.2.1	Market Trends
6.2.2	Market Forecast
6.3	Services
6.3.1	Market Trends
6.3.2	Market Forecast
7	Market Breakup by Deployment
7.1	Cloud-based
7.1.1	Market Trends
7.1.2	Market Forecast
7.2	On-premises
7.2.1	Market Trends
7.2.2	Market Forecast
8	Market Breakup by Application
8.1	Crew Planning
8.1.1	Market Trends

    - 9.4.2.2 Market Forecast
  - 9.4.3 Others
    - 9.4.3.1 Market Trends
    - 9.4.3.2 Market Forecast
- 9.5 Middle East and Africa
  - 9.5.1 Market Trends
  - 9.5.2 Market Breakup by Country
  - 9.5.3 Market Forecast
- 10 Drivers, Restraints, and Opportunities
  - 10.1 Overview
  - 10.2 Drivers
  - 10.3 Restraints
  - 10.4 Opportunities
- 11 Value Chain Analysis
- 12 Porters Five Forces Analysis
  - 12.1 Overview
  - 12.2 Bargaining Power of Buyers
  - 12.3 Bargaining Power of Suppliers
  - 12.4 Degree of Competition
  - 12.5 Threat of New Entrants
  - 12.6 Threat of Substitutes
- 13 Price Analysis
- 14 Competitive Landscape
  - 14.1 Market Structure
  - 14.2 Key Players
  - 14.3 Profiles of Key Players
