Report description:

Non-Life Insurance in Japan

Summary

Non-Life Insurance in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- Non-life insurance is defined as any insurance not determined to be life insurance. It includes automobile and homeowners' policies and provides payments depending on the loss from a particular financial event. The market value is measured by the written premium generated by market players within a given year.
- The Japanese non-life insurance market recorded written premiums of \$82.0 billion in 2023, representing a negative compound annual growth rate (CAGR) of 3.7% between 2018 and 2023.
- The motor segment accounted for the market's largest proportion in 2023, with total written premiums of \$39.8 billion, equivalent to 48.5% of the market's overall value.
- Rising inflation pressured the Japanese non-life insurance market by increasing costs for both insurers and consumers. The National Statistics Office reports that Japan's consumer price inflation of health reached 1.9% in 2023, up from -0.3% from the previous year. This elevated the cost of premiums and claims, discouraging new policy purchases and renewals, thereby dampening overall market growth.

Scope

- Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the non-life
