Report description:

In 2024, Spain's personal accessories market faced significant challenges due to worsening economic conditions. With the prices of basic goods rising and interest rates increasing, the disposable income of the average Spaniard declined. This economic pressure was compounded by the fact that a majority of Spaniards have mortgages, further reducing their spending power. As a result, consumers adopted a more cautious and savings-focused approach, which led to many switching to lower-priced alternatives.

Euromonitor International's Personal Accessories in Spain report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2020-2024), allowing you to identify the sectors driving growth.
