Report description:

In 2024, refrigeration appliances in Ukraine continued to recover from the slump in demand due to the outbreak of war in February 2022. Indeed, overall retail volume sales of refrigeration appliances exceeded the 2021 level for the first time in 2024. This was due to the performances of freezers and fridge freezers. Despite growth in retail volume sales, the market sizes of fridges and electric wine coolers/chillers remained slightly below their 2021 level.
