

**Roof Coating Market by Coating Type (Bituminous, acrylic, silicone, epoxy, polyurethane), Roof Type (Flat, low-sloped, steep-sloped, and roof types others), Solution Technology (water-based, and solvent-based), End-Use Sector - Global Forecast to 2029**

Market Reprt | 2025-02-10 | 282 pages | MarketsandMarkets

**AVAILABLE LICENSES:**

- Single User \$4950.00
- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

**Report description:**

The roof coating market size is projected to grow from USD 8.72 billion in 2024 and is projected to reach USD 10.16 billion by 2029, at a CAGR of 3.1%. The roof coating market has a promising future due to the growing demand for energy-efficient solutions. As more buildings are being updated to meet energy efficiency standards, and increased construction in developing markets the demand for roof coatings continues to rise. There are plenty of opportunities in the growing renovation market which will propel the market.

" Bitunimous are projected to be the second largest segment by coating in roof coating market"

Bituminous roof coatings are known for their excellent waterproofing and durability. They are mainly used on flat and low-sloped roofs in industrial, commercial, and residential buildings. The demand for bituminous coatings is growing due to increased infrastructure development. They are popular in developing countries like India and Brazil as urban growth is driving construction. Bituminous coatings are great for areas with extreme temperatures. The development of modified bituminous coatings has made them even more flexible and effective.

"Low-sloped is projected to be the second largest segment by roof type in roof coating market"

Low-sloped roofs are popular because they are practical and cost-effective. Roof coatings are commonly used on these roofs to solve issues like leaks, water pooling, and quick wear. These roofs are mostly found in industrial and commercial buildings and are increasingly used in residential buildings. Low-sloped roofs are easy to build, need little maintenance, and are affordable,

[www.scotts-international.com](http://www.scotts-international.com)

making them a popular choice for residential projects.

"Water-based is the largest segment by solution technology in roof coating market during forecast region."

Water-based roof coatings are widely used because they are eco-friendly, easy to apply, and offer strong protection. They are safer for the environment and workers since they don't contain harmful chemicals. These coatings provide excellent adhesion, flexibility, and UV resistance, helping roofs withstand extreme temperatures. They are also convenient and cost-effective. Water-based coatings can be designed for various purposes, such as waterproofing and thermal insulation.

"Europe counts for the second-largest share in roof coating market by region"

Europe is the second-largest market for roof coatings because of strict building rules and high demand for eco-friendly construction materials. The region's mixed weather conditions make durable and weather-resistant roof coatings essential. Countries like Germany, France, and the UK use cool roof coatings to save energy and support green building efforts.

By Company Type: Tier 1: 25%, Tier 2: 42%, and Tier 3: 33%

By Designation: C-level Executives: 20%, Directors: 30%, and Others: 50%

By Region: North America: 20%, Europe: 10%, Asia Pacific: 40%, South America: 10%, Middle East & Africa 20%

Notes: Others include sales, marketing, and product managers.

Tier 1: >USD 1 Billion; Tier 2: USD 500 million-1 Billion; and Tier 3: <USD 500 million

Companies Covered: PPG Industries, Inc., (US), Sika AG (Switzerland), The Sherwin-Williams Company (US), Akzo Nobel N.V. (The Netherlands), and Nippon Paint Holdings Co., Ltd. (Japan), and others are covered in the roof coating market.

The study includes an in-depth competitive analysis of these key players in the roof coating market, with their company profiles, recent developments, and key market strategies

#### Research Coverage

This research report categorizes the roof coating market by coating type (bituminous, acrylic, silicone, epoxy, polyurethane, and coating other types), by roof type (flat, low-sloped, steep-sloped, and roof types others), by solution technology (water-based, and solvent-based), end-use sector (residential, and non-residential) and by region (Asia Pacific, North America, Europe, South America, and Middle East & Africa). The scope of the report covers detailed information regarding the major factors, such as drivers, restraints, challenges, and opportunities, influencing the growth of the roof coating market. A detailed analysis of the key industry players has been done to provide insights into their business overview, solutions, and services; key strategies; Contracts, agreements, new product launches, acquisitions, and recent developments associated with the roof coating market. Competitive analysis of upcoming startups in the roof coating market ecosystem is covered in this report.

#### Reasons to buy the report

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall roof coating market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and to plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

- Analysis of key drivers (Rising investments in construction activities), restraints (High cost of advanced coatings), opportunities (Increasing demand for roof coatings from emerging markets), and challenges (Unpredictability of raw material prices).
- Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the roof coating market
- Market Development: Comprehensive information about profitable markets - the report analyses the roof coating market across varied regions.
- Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the roof coating market.

- Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players PPG Industries, Inc., (US), Sika AG (Switzerland), The Sherwin-Williams Company (US), Akzo Nobel N.V. (The Netherlands), and Nippon Paint Holdings Co., Ltd. (Japan) among others in the roof coating market.
