- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

Report description:

The global market for microencapsulation is estimated to be valued at USD 15.38 billion in 2024 and is projected to reach USD 24.07 billion by 2029, at a CAGR of 9.4% during the forecast period. AI technologies include advanced data analysis and predictive modeling that enables the manufacturers to achieve optimization of the microencapsulation techniques, mainly spray drying and coacervation. This can result in new formulations with tailored properties where always, controlled release, and enhanced stability are included. In addition, AI-powered simulation allows rapid prototyping, which reduces the time needed for research and development. Combining the algorithms of machine learning into quality control assures product quality consistency, along with defects or variations identified in real-time. The AI applications in supply chain management have streamlined the processes in ways that reduce waste and, ultimately minimize costs so that micro-encapsulated products are more accessible and appealing to the end-users in pharmaceuticals and food industries.

Disruption in the microencapsulation market: The microencapsulation market is seeing tremendous disruptive changes because various applications of products require new enhanced performance regarding improved safety and convenience.

Microencapsulation permits the controlled release of active ingredients, which otherwise degrade, and whose functionality is further improved by application in food, pharmaceutical, and personal care products. This technology provides accurate delivery mechanisms where the right amount of nutrients or compounds are released at the proper time and place for maximum impact.

Some of the key disruptions in the microencapsulation market include:

- ☐Technological Advancements: Innovations such as nanotechnology and 3D printing now allow microencapsulation processes to be more precise and efficient; these technologies improve the stability and enhance the bioavailability of active ingredients.
- ☐Prominence and Rising Demand for Functional Products: Increased demand for safe, consumer-safe functional foods and nutraceuticals that do not compromise in terms of quality and taste is driving demand for effective microencapsulation solutions

www.scotts-international.com

that ensure safe delivery of health benefits.

- Sustainability Concerns: Greater awareness about sustainability creates pressures on manufacturers to produce encapsulation materials that are biodegradable and as nontoxic and harmless to the environment as possible. This shifts raw material sourcing and production processes accordingly.

"The Pharmaceutical sub-segment holds a dominant market share among the end-use industries in the microencapsulation market."

The demand for precise drug delivery systems plays an important role in enhancing therapeutic results. The microencapsulation technology allows for the gradual release of active pharmaceutical ingredients, thus ensuring that medicine is administered at the right dose and over time, which would be more appropriate for chronic disease treatments like diabetes and hypertension. It also enhances the bioavailability of poorly soluble drugs and, hence, their efficacy. In addition, microencapsulation is required in masking drugs with unpleasant taste or odor for better patient compliance especially in pediatric and geriatric care. This technology also plays a significant role in shielding sensitive compounds from degradation by the gastrointestinal tract so that drugs can reach their target areas unabated. These factors along with the increasing demand for personalized medicines and complex drug formulation make the pharmaceutical sector the largest end-use industry in the microencapsulation market.

"the spray technology sub-segment holds a dominant market share among the technology in the microencapsulation market."

Spray technology is one of the key sub-segments in the microencapsulation market with high market shares due to versatility and efficiency in production of encapsulated products. It applies different techniques such as spray drying and spray chilling in encapsulating various core materials including vitamins, flavors, and fragrances. The main advantage of spray technology is that it permits the production of uniform microcapsules with definite size and a predictable release profile, significantly enhancing the stability and bioavailability of sensitive ingredients.

spray technology allows the manufacture at a tremendous speed, thus enabling corporations to rapidly respond to increasingly high market demands. Responding to the desire to create a more sustainable industry, this kind of technology has gained a lot of acceptance lately because it helps produce 'green' encapsulation materials that decrease the undesirable impact on the environment. The improvements in process optimization with the quality of the product are furthered through innovations in spray technology, such as advanced nozzles and automated systems.

North America region holds a dominant market share in the microencapsulation market.

Major manufacturers here have strong representativeness, and huge innovations are put into it. This region houses many leading companies associated with developing advanced microencapsulation solutions for widespread applications, such as International Flavors & Fragrances Inc. (US), Sensient Technologies Corporation(US), Balchem Corp. (US), DuPont. (US), Cargill Incorporated (US), Lycored (New Jersey), and Koehler Group (US)

Substantial research and development investments in this region facilitate the adaptation of new encapsulation technologies and an increase in the functionality of the products. The increasing consumer demand for fortified and functional food products further pushes the market forward as manufacturers look for microencapsulation as the route to enhance nutrient delivery and stability. The necessity for sustainability and clean-label products in North America has placed a high emphasis on eco-friendly encapsulation methods within those organizations, further reinforcing North America as a leading market.

In-depth interviews have been conducted with chief executive officers (CEOs), Directors, and other executives from various key organizations operating in the microencapsulation market:

- By Company Type: Tier 1 - 25%, Tier 2 - 45%, and Tier 3 - 30%

- By Designation: Directors- 20%, Managers - 50%, Others- 30%

- By Region: North America - 25%, Europe - 30%, Asia Pacific - 20%, South America - 15% and Rest of the World -10%

Prominent companies in the market include BASF (Germany), FrieslandCampina (Netherlands), dsm-firmenich (Switzerland), Givaudan (Switzerland), International Flavors & Fragrances Inc. (US), Sensient Technologies Corporation (US), Balchem Corp. (New Jersey), Ingredion (US), Kerry Group plc (Ireland), Symrise (Germany), DuPont (US), Cargill Incorporated (US), Syngenta

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

(Switzerland), Lycored (New Jersey), Koehler Group (US).

Other players include Aveka Group (US), TasteTech (UK), Clextal (France), Microtek Laboratories, Inc. (US), Advanced BioNutrition Corp (Columbia), Vitae Naturals (Spain), Vitablend (Netherlands), Maxx Performance Inc. (US), Arcade Beauty (US), and Sphera Encapsulation (Italy).

Research Coverage:

This research report categorizes the microencapsulation market by shell material (Polymers, Gums & resins, Lipids, Carbohydrates, Proteins) by core material (agricultural inputs, food & beverage ingredients, active ingredients, fragrances, phase change materials, and others), core material type (Solid, Liquid, Gas), technology, end-user industry, functionality, and region (North America, Europe, Asia Pacific, South America, and Rest of the World). The scope of the report covers detailed information regarding the major factors, such as drivers, restraints, challenges, and opportunities, influencing the growth of microencapsulation. A detailed analysis of the key industry players has been done to provide insights into their business overview, services, key strategies, contracts, partnerships, agreements, new service launches, mergers and acquisitions, and recent developments associated with the microencapsulation market. Competitive analysis of upcoming startups in the microencapsulation market ecosystem is covered in this report. Furthermore, industry-specific trends such as technology analysis, ecosystem and market mapping, and patent, and regulatory landscape, among others, are also covered in the study.

Reasons to buy this report:

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall microencapsulation and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

- Analysis of key drivers (Increased R&D activities for process efficiency to enhance market penetration), restraints (High costs associated with the microencapsulated process), opportunities (Development of advanced technologies to tap niche markets), and challenges (Stability of microencapsulated ingredients in a varying atmosphere) influencing the growth of the microencapsulation market.
- New product launch/Innovation: Detailed insights on research & development activities and new product launches in the microencapsulation market.
- Market Development: Comprehensive information about lucrative markets - the report analyzes the microencapsulation across varied regions.
- Market Diversification: Exhaustive information about new services, untapped geographies, recent developments, and investments in the microencapsulation market.
- Competitive Assessment: In-depth assessment of market shares, growth strategies, product offerings, brand/product comparison, and product food prints of leading players such as BASF (Germany), FrieslandCampina (Netherlands), dsm-firmenich (Switzerland), Givaudan (Switzerland), International Flavors & Fragrances Inc. (US) and other players in the microencapsulation market.

5	MARKET OVERVIEW	64
5.1	INTRODUCTION	64
5.2	MACROECONOMIC INDICATORS	64
5.2.1	HIGHER INVESTMENT IN RESEARCH AND DEVELOPMENT	64
5.2.2	GROWTH OPPORTUNITIES IN DEVELOPING REGIONS SUCH AS ASIA PACIFIC	65
5.3	MARKET DYNAMICS	66
5.3.1	DRIVERS	67
5.3.1.1	Increase in demand for fortified food products with health benefits	67
5.3.1.1.1	Increase in demand from food industry	67
5.3.1.1.2	Growing use in functional food	67
5.3.1.2	Rise in demand from pharmaceutical industry	68
5.3.1.2.1	Controlled drug delivery	68
5.3.1.2.2	Targeted drug delivery	69
5.3.1.3	Rise in demand from agrochemicals sector	69
5.3.1.3.1	Controlled release technique to enhance efficiency of agrochemicals	69
5.3.1.3.2	Controlled release application for convenience in use	69
5.3.1.3.3	Reduced application cost	70
5.3.1.3.4	Increase in environmental concerns	70
5.3.1.4	Increased consumer demand for functional products	70

5.3.1.5	Widespread applications of microencapsulation	71
5.3.1.5.1	Rise in demand to enhance product functionality	72
5.3.2	RESTRAINTS	73
5.3.2.1	High cost associated with microencapsulated process	73
5.3.2.2	Competition from low-cost alternatives	73
5.3.3	OPPORTUNITIES	74
5.3.3.1	Innovations in camel thorn extract production	74
5.3.3.2	Development of advanced technologies to tap niche markets	74
5.3.3.2.1	Reduction in capsule size and increase in bioavailability	75
5.3.3.2.2	Need for multi-component delivery systems	75
5.3.3.3	Technological advancements in sustainable microencapsulation	76
5.3.4	CHALLENGES	77
5.3.4.1	Balancing performance and sustainability in microencapsulation coatings	77
5.3.4.2	Regulatory challenges hindering innovation and increasing costs	77
5.3.4.3	Technical constraints associated with high costs	78
5.3.4.4	Selecting appropriate technology complicating efficiency and scalability in microencapsulation	79
5.4	IMPACT OF GEN AI ON MICROENCAPSULATION	79
5.4.1	INTRODUCTION	79
5.4.2	USE OF GEN AI IN MICROENCAPSULATION	80
5.4.3	CASE STUDY ANALYSIS	81
5.4.3.1	Automated solutions for microencapsulation	81
5.4.3.2	Leveraging generative AI for enhanced automation in polymer microencapsulation image processing	81
5.4.4	IMPACT OF GEN AI ON MICROENCAPSULATION MARKET	82
5.4.5	ADJACENT ECOSYSTEM WORKING ON GEN AI	82

7	MICROENCAPSULATION MARKET, BY CORE MATERIAL	130
7.1	INTRODUCTION	131
7.2	ACTIVE INGREDIENTS	133
7.2.1	RISE IN DEMAND FOR MICROENCAPSULATION OF ACTIVE INGREDIENTS IN PERSONAL CARE AND FORTIFIED FOODS	133
7.3	FRAGRANCES	134
7.3.1	FRAGRANCES TO BE LEADING CORE MATERIALS IN MICROENCAPSULATION MARKET	134
7.4	FOOD & BEVERAGE INGREDIENTS	135
7.4.1	DEMAND FOR NUTRIENT-RICH, FLAVOR-STABILIZED PRODUCTS TO DRIVE CORE MATERIAL SEGMENT IN MICROENCAPSULATION	135
7.4.2	VITAMINS AND MINERALS	136
7.4.2.1	Microencapsulation enhances vitamin stability, bioavailability, and dosing efficiency in food products	136
7.4.3	ENZYMES	137
7.4.3.1	Microencapsulation of enzymes enhances stability, targeted release, and efficiency in various industrial applications	137
7.4.4	ADDITIVES	137
7.4.4.1	Acidulants, flavoring & coloring agents, and vitamins & minerals are largely encapsulated for food fortification	137
7.4.5	PREBIOTICS AND PROBIOTICS	138
7.4.5.1	Microencapsulation protects prebiotics and probiotics, enhancing stability and effectiveness in functional foods	138
7.4.6	ESSENTIAL OILS	138
7.4.6.1	Microencapsulation protects essential oils, enhancing controlled release and prolonged efficacy	138
7.4.7	OTHER FOOD & BEVERAGE INGREDIENTS	138
7.5	AGRICULTURAL INPUTS	140
7.5.1	ADVANCES IN EMULSION CHEMICAL PROCESSES ENHANCE PRECISE ENCAPSULATION FOR STABLE, CONTROLLED-RELEASE FORMULATIONS	140
7.6	PHASE CHANGE MATERIALS	141
7.6.1	TEXTILE AND CONSTRUCTION TO DRIVE PHASE CHANGE MATERIAL MARKET	141
7.7	OTHER CORE MATERIALS	142
8	MICROENCAPSULATION MARKET, BY CORE MATERIAL FORM	143
8.1	INTRODUCTION	144
8.2	SOLID	145
8.2.1	INCREASED DEMAND FOR MICROENCAPSULATION OF SOLID CORE MATERIALS ACROSS INDUSTRIES TO DRIVE GROWTH	145
8.3	LIQUID	145
8.3.1	USE OF MICROENCAPSULATION IN FOOD INDUSTRY TO DRIVE MARKET	145
8.4	GAS	146
8.4.1	GAS MICROENCAPSULATION ENHANCES STABILITY AND CONTROLLED RELEASE OF FRAGRANCES AND VOLATILE COMPOUNDS	146

12.4	FOOD & BEVERAGES	183
12.4.1	DAIRY	185
12.4.1.1	Increasing demand for fortified dairy products to drive market	185
12.4.2	BEVERAGES	186
12.4.2.1	Increasing demand for fortified beverage products to drive microencapsulation market	186
12.4.3	BAKERY AND CONFECTIONERY	186
12.4.3.1	Increased use of microencapsulation in baking dough to drive market	186
12.4.4	SNACKS AND READY-TO-EAT MEALS	186
12.4.4.1	Microencapsulation in food preservation to drive market	186
12.4.5	MEAT AND POULTRY	187
12.4.5.1	Preservation of meat to drive microencapsulation market	187
12.4.6	INFANT NUTRITION	187
12.4.6.1	Microencapsulation in infant nutrition for better absorption to drive market	187
12.4.7	OTHER FOOD & BEVERAGE SEGMENTS	187
12.5	AGRICULTURE	189
12.5.1	PESTICIDES, HERBICIDES, AND INSECTICIDES	190
12.5.1.1	Microencapsulation enhances pesticide efficacy, stability, and environmental sustainability	190
12.5.2	FERTILIZERS	190
12.5.2.1	Use of microencapsulation for increased stability and longer shelf life to drive market	190
12.5.3	PLANT GROWTH REGULATORS	191
12.5.3.1	Use of microencapsulation to protect plant growth regulators from environmental factors to drive market	191
12.6	BUILDING & CONSTRUCTION	192
12.6.1	INSULATION MATERIALS	194
12.6.1.1	Microencapsulation enhances insulation with phase change materials for efficiency	194
12.6.2	COATINGS AND SEALANTS	194
12.6.2.1	Microencapsulation enhances coatings, improving energy efficiency and durability in construction	194
12.6.3	FIREPROOFING MATERIALS	194
12.6.3.1	Microencapsulation enhances fireproofing materials, improving safety and sustainability	194
12.7	TEXTILES	196
12.7.1	PERFUMES AND ESSENTIAL OILS	196
12.7.1.1	Microencapsulation enhances textiles with lasting fragrances and functional properties	196
