**Report description:**

Coated Solar Control Glass Market□

The coated solar control glass market was valued at \$5.3 billion in 2023 and is projected to reach \$13.1 billion by 2032, growing at a CAGR of 10.5% from 2024 to 2032.□

A coated solar control glass is a type of glass glazed with double or triple layers of metal oxide on its internal surface. The coated metal oxide exhibits remarkable optical properties which enable the blocking of radiant heat energy of the sun. The major benefits of installing coated solar control glasses include enhanced comfort for occupants, UV protection, glare reduction, and improved energy efficiency.□□

Increase in sustainability initiatives in infrastructure development has boosted the adoption of coated solar control glass, augmenting the growth of the market. In addition, rise in awareness regarding the harmful effects of the sun's UV radiation is a key driver of the coated solar control glass market. Furthermore, the glass is observing a surge in adoption due to its aesthetic appeal, propelling the market development. To enhance the applicability of the glass, development of sturdy, ultrathin coated solar control glass is trending in the market. This type of glass exhibits high flexibility and improved light transmission, presenting the possibility of its utility in applications beyond buildings and infrastructure.□

However, the high cost of coated solar control glass as compared to traditional glasses hampers the growth of the market. Furthermore, complex installation process of the glass requires significantly skilled technicians, lack of which hinders the development of the market. On the contrary, as contractors and developers are striving to reduce energy consumption of their constructed buildings to comply with the Green Building Initiatives, the coated solar control glass market is anticipated to witness several lucrative opportunities in the future. According to the International Energy Agency, buildings account for approximately

30% of total energy consumption. Therefore, the installation of coated solar control glass is a remarkable step to enhance the energy efficiency of buildings as the reflective capabilities of the glass keep buildings cool in summers and warm in winters.[]

#### Segment Review[]

The coated solar control glass market is segmented into type, coating method, application, and region. On the basis of type, the market is bifurcated into low-emissivity (low-E) glass and reflective coated glass. Depending on coating method, it is divided into pyrolytic and sputtered. By application, it is classified into residential buildings, commercial buildings, and automotive. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.[]

#### Key Findings[]

On the basis of type, the low-emissivity (low-E) glass segment is expected to hold a high market share during the forecast period.[]

Depending on coating method, the sputtered segment is projected to dominate the market by 2032.[]

By application, the commercial buildings segment is anticipated to account for a high market share during the forecast period.[]

Region wise, Asia-Pacific is predicted to be the highest revenue generator by 2032.[]

#### Competition Analysis[]

The leading players operating in the global coated solar control glass market include Guardian Industries Holdings, AGC Glass Europe, Saint-Gobain, Nippon Sheet Glass Co., Ltd, Vitro, Xinyi Glass Holdings Limited, CARDINAL GLASS INDUSTRIES, INC, Euroglas GmbH, Jinjing (Group) Co., Ltd., and Sisecam. These major players have adopted various key development strategies such as business expansion, new product launches, and partnerships to strengthen their foothold in the competitive market.[]

Additional benefits you will get with this purchase are:

- Quarterly Update and\* (only available with a corporate license, on listed price)
- 5 additional Company Profile of client Choice pre- or Post-purchase, as a free update.
- Free Upcoming Version on the Purchase of Five and Enterprise User License.
- 16 analyst hours of support\* (post-purchase, if you find additional data requirements upon review of the report, you may receive support amounting to 16 analyst hours to solve questions, and post-sale queries)
- 15% Free Customization\* (in case the scope or segment of the report does not match your requirements, 15% is equivalent to 3 working days of free work, applicable once)
- Free data Pack on the Five and Enterprise User License. (Excel version of the report)
- Free Updated report if the report is 6-12 months old or older.
- 24-hour priority response\*
- Free Industry updates and white papers.
